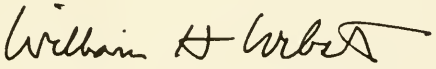
FOREWORD

While the incidence of crime in the United States remains at intolerable levels, the law enforcement community can take some degree of pride in the fact that crime has decreased for three consecutive years. Various reasons have been given for the decline, many of which encompass and demonstrate the efforts of the law enforcement community. Increased citizen interest and cooperation in crime prevention have been engendered by law enforcement agencies either through formal programs or as a result of positive community relations. The fact that the prison population is at an all-time high, thus reducing recidivism, is directly related to persistent law enforcement and investigative initiatives. Improved training of personnel and enhanced management resources have made law enforcement more effective and efficient. The coming of the information age has been a major boon to many agencies in improving operations.

We must now meet the challenge of applying electronic and computer technology to the collection and analysis of crime data. Not only vitally important to the local community, but also at the state and national levels, reliable data on crime and offenders to satisfy twentieth-century law enforcement needs are critical to continued success in the fight against crime.

In an attempt to identify those informational needs, the Uniform Crime Reporting (UCR) Program has undergone almost three years of an independent study by an outside consultant group. Encompassing the concerns of all levels of law enforcement, vast and exciting recommendations for expanding and enhancing our capabilities in crime-element analysis and understanding have surfaced during the study. UCR advisory committees from the International Association of Chiefs of Police and the National Sheriffs' Association have enthusiastically endorsed the concept of the recommendations and other groups have had an opportunity to comment individually. We at the Federal level are studying the long-term economic and utility potential of the recommendations. When firm decisions are finally agreed upon, we in the law enforcement community must be able to look well beyond this decade and to plan for the next century in order to foster this valuable informational tool.

Fewer Crime Index offenses were reported to law enforcement last year than in any year since 1978. The slight increase in the last quarter of 1984, however, makes us wary that the unprecedented three-year period of decline may be coming to an end. Although we have certainly made strides in combatting lawlessness, our commitment to vigorous enforcement and crime resistance measures must not falter if we are to expect continued declines.



William H. Webster
Director

CRIME FACTORS

The presence of crime in our Nation is a matter of serious concern not only to the law enforcement profession, but to society at large. Historically, the causes and origins of crime have been the subjects of investigation by many disciplines. While no definitive conclusions have yet been reached, a number of factors affecting the volume and type of crime that occurs from place to place have been delineated. Some of these are as follows:

Population density and size of locality and its surrounding area.

Variations in composition of the population, particularly age structure.

Stability of population with respect to residents' mobility and transient factors.

Economic conditions, including job availability.

Cultural conditions, such as educational, recreational, and religious characteristics.

Climate.

Effective strength of law enforcement agencies.

Administrative and investigative emphases of law enforcement.

Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).

Attitudes of citizenry toward crime.

Crime reporting practices of citizenry.

The Uniform Crime Reports give a nationwide view of crime based on statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data presented. The reader is, therefore, cautioned against comparing statistical data of individual reporting units from cities, counties, states, or colleges and universities solely on the basis of their population coverage or student enrollment.

SECTION I
SUMMARY OF THE UNIFORM CRIME REPORTING PROGRAM

For over 50 years, the Uniform Crime Reporting (UCR) Program has served as a national clearinghouse for crimes reported to city, county, and state law enforcement agencies. A nationwide cooperative venture of nearly 16,000 contributors who voluntarily report data on crimes brought to their attention, the Program produces periodic assessments of the nature and type of crime in the Nation. Although its primary objective is to generate a reliable set of criminal statistics for use in law enforcement administration, operation, and management, the Program's data have become one of the leading social indicators in the country. The American public looks to UCR for information on fluctuations in the level of crime, while criminologists, sociologists, legislators, municipal planners, the press, and other students of criminal justice use the statistics for varied research and planning purposes.

Historical Background

In the 1920s, the International Association of Chiefs of Police (IACP) recognized a need for national crime statistics and formed the Committee on Uniform Crime Records to develop a viable system of uniform police statistics. After studying state criminal codes and making an evaluation of the recordkeeping practices in use, the Committee in 1929 finalized a plan for crime reporting which became the foundation of the UCR Program.

Since offenses known to law enforcement were the most readily available crime information, the Committee elected to survey local agencies to obtain data on crimes brought to their attention. Realizing that not all crimes are reported, the Committee evaluated various offenses on the basis of their seriousness, frequency of occurrence, pervasiveness in all geographic parts of the country, and likelihood of being reported to law enforcement. Using those criteria, seven offenses were chosen to serve as an Index for gauging fluctuations in the overall volume and rate of crime. Known jointly as the Crime Index, these offenses included the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault and the property crimes of burglary, larceny-theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth Index offense in 1979.

During the early planning of the Program, it was recognized that the differences among criminal codes precluded a mere aggregation of state statistics to arrive at a national total. Further, because of the variances in punishment for the same offenses in different state codes, no distinction between felony and misdemeanor crimes was possible. To avoid these problems and provide nationwide uniformity in crime reporting, standardized offense definitions were formulated. Today, as at the Program's outset, law enforcement agencies submit data in accordance with the UCR standard definitions without regard for local statutes. The definitions used by the Program are set forth in Appendix II of this publication.

In January 1930, 400 cities representing 20 million inhabitants in 43 states began participating in the UCR Program. In that same year, Congress enacted legislation under Title 28, Section 534, of the United States Code authorizing the Attorney General to gather crime information. The Attorney General, in turn, designated the FBI to serve as the national clearinghouse for the data collected. Since that time, data based on uniform classifications and procedures for reporting have been obtained from the Nation's law enforcement agencies.

Providing vital links between local law enforcement and the FBI are the IACP and the National Sheriffs' Association (NSA). The IACP's Committee on Uniform Crime Records, as it has since the Program began, represents the thousands of police departments nationwide. The NSA's Committee on Uniform Crime Reporting, established in June 1966, encourages sheriffs throughout the country to fully participate in the Program. Both committees serve in advisory capacities concerning the UCR Program's operation.

Committees on Uniform Crime Reporting within state law enforcement associations are also active in promoting interest in the UCR Program. These committees foster widespread and more intelligent use of uniform crime statistics and lend assistance to contributors when the need arises.

Methods of Data Collection

The information compiled by UCR contributors is forwarded to the FBI either directly from the local law enforcement agency or through a state-level UCR Program. Agencies submitting directly to the FBI are provided continuing guidance and support on an individual basis.

State-level UCR Programs are very effective intermediaries between the FBI and its local contributors. Many of the 41 state Programs have mandatory reporting requirements and collect data beyond the national UCR scope to address crime problems germane to their particular locales. In most cases, these agencies are also able to provide more direct and frequent service to participating law enforcement agencies, to make information more readily available for use at the state level, and to contribute to more streamlined operations at the national level.

With the development of a state UCR Program, the FBI ceases direct collection of data from individual law enforcement agencies within the state. Instead, information from local agencies is forwarded to the national Program through the state data collection agency.

The conditions under which these systems are developed ensure consistency and comparability in the data submitted to the national Program, as well as provide for regular and timely reporting of national crime data. These conditions are: (1) The state Program must conform to national Uniform Crime Reports' standards, definitions, and information requirements. The states are not, of course, prohibited from collecting other statistical data beyond the national requirements. (2) The state criminal justice agency must have a proven, effective, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by the national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tapes. (6) The state agency must have the proven capability (tested over a period of time) to supply all the statistical data required in time to meet national Uniform Crime Reports' publication deadlines.

To fulfill its responsibilities in connection with the UCR Program, the FBI continues to edit and review individual agency reports for both completeness and quality; has direct contact with individual contributors within the state when necessary in connection with crime reporting matters, coordinating such contact with the state agency; and upon request, conducts training programs within the state on law enforcement records and crime reporting procedures. Should circumstances develop whereby the state agency does not comply with the aforementioned requirements, the national Program may reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

Reporting Procedures

Law enforcement agencies across the country report monthly to the UCR Program. From records of all reports of crime received from victims, officers who discover infractions, or other sources, the agencies tabulate the number of Crime Index or Part I offenses brought to their attention. Specifically, the crimes reported to the FBI are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count. The number of "actual offenses known" is reported to the FBI regardless of whether anyone is arrested for the crime, stolen property is recovered, or prosecution is undertaken.

Another integral part of the monthly submission is the total number of actual Crime Index offenses cleared. Crimes are "cleared" in one of two ways: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) by exceptional means when some element beyond police control precludes the arrest of an offender. Law enforcement agencies also report the number of Index crime clearances which involve only offenders under the age of 18; the value of property stolen and recovered in connection with the offenses; and detailed information pertaining to criminal homicide and arson.

In addition to its primary collection on Crime Index (Fart I) offenses, the UCR Program solicits monthly data on persons arrested for all crimes except traffic violations. The age, sex, race, and ethnic origin of arrestees are reported for both Part I and Part II offenses by crime category. Part II offenses include all crimes not classified as Part I.

Various data on law enforcement officers killed or assaulted are collected on a monthly basis. The number of full-time sworn and civilian personnel are reported annually, as of October 31.

Editing Procedures

Each report submitted to the UCR Program is thoroughly examined for arithmetical accuracy and for deviations which may indicate errors. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions by the agency and with those for similar agencies. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in the jurisdiction's geopolitical structure.

Data reliability is a high priority of the Program and noted deviations or arithmetical adjustments are brought to the attention of the state UCR Program or the submitting agency through correspondence. A standard procedure of the FBI is to study the monthly reports and to evaluate periodic trends prepared for individual reporting units. Any significant increase or decrease is made the subject of a special inquiry. When it is found that changes in crime reporting procedures or annexations are influencing the level of crime, the figures for specific crime categories, or if necessary, totals are excluded from trend tabulations.

To assist contributors in complying with UCR standards, the national Program provides training seminars and instructional materials in crime reporting procedures. Throughout the country, liaison with state Programs and law enforcement personnel is maintained, and training sessions are held to explain the purpose of the Program, the rules of uniform classification and scoring, and the methods

of assembling the information for reporting. When an individual agency has specific problems in compiling its crime statistics and remedial efforts are unsuccessful, FBI Headquarters' personnel may visit the contributor to aid in resolving the difficulties.

The *Uniform Crime Reporting Handbook*, which details procedures for classifying and scoring offenses, is supplied to all contributors as the basic resource document for preparing reports. Also, since a good records system is essential for accurate crime reporting, the FBI furnishes the *Manual of Law Enforcement Records*, a guide in the establishment of a sound law enforcement records system.

To enhance communication among Program participants, the UCR "Newsletter" and State UCR Program "Bulletin" are utilized to address Program policy, as well as present information and instructional material. These communications are produced as needed.

The final responsibility for data submissions rests with the individual contributing law enforcement agency. Although the Program makes every effort through its editing procedures, training practices, and correspondence to assure the validity of the data it receives, the statistics' accuracy depends primarily on the adherence of each contributor to the established standards of reporting. Deviations from these established standards which cannot be resolved by the national UCR Program may be brought to the attention of the Committee on Uniform Crime Records of the IACP or the Committee on Uniform Crime Reporting of the NSA.

Reporting Area

The presentation of statistics by reporting area facilitates analyzing local crime counts in conjunction with those for areas of similar geographic makeup. Geographically, the United States is divisible by regions, divisions, and states. As discussed in Appendix III, further breakdowns rely on population figures and proximity to metropolitan areas.

A Metropolitan Statistical Area (MSA) is an integrated economic and social unit with a recognized large population nucleus. Each has a central city of at least 50,000 population or an urbanized area of at least 50,000 with a total population of at least 100,000. Contiguous counties which meet specified criteria of metropolitan character and integration, designated suburban counties in UCR, are included. Due to changes in the geographic compositions of MSAs, no year-to-year comparisons of data for those areas should be attempted.

Rural counties and "other cities," most of which are incorporated, are outside MSAs. As a general rule, sheriffs, county police, and state police report crimes committed within the limits of the counties but outside cities, while local police report crimes committed within the city limits.

Certain tables within this publication present statistics relative to "suburban" areas. A suburban area consists of cities with less than 50,000 inhabitants together with counties which are within an MSA. In this context, the central city is, of course, excluded. The concept of suburban area is especially important in a study of this nature because of the particular crime conditions which exist in the communities surrounding the Nation's largest cities.

During 1984, law enforcement agencies active in the UCR Program represented approximately 227 million United States inhabitants, or 96 percent of the total population as established by the Bureau of the Census. The coverage amounted to 98 percent of the United States population living in MSAs, 94 percent of the population in "other cities," and 90 percent of the rural population.

Although most law enforcement agencies submit crime reports to the UCR Program, data are sometimes not received for complete annual periods. To be included in this publication's Tables 6, 7, 8, and 9, showing specific jurisdictional statistics, figures for all 12 months of the current year must have been received at the FBI prior to established publication deadlines. Other tabular presentations are aggregated as set forth in Appendix I. Unless consisting of estimates for the total population, each table in this publication shows the number of agencies reporting and the extent of population coverage.

Population Data

Current year population figures for the Nation, states, geographic regions, and divisions are Bureau of the Census provisional estimates as of July 1, 1984. Using these figures along with 1982 Bureau of the Census city and county estimates, the populations of individual jurisdictions were extrapolated (see Appendix III). The estimated United States population increase in 1984 was approximately 1 percent over the 1983 estimate.

Offense Estimation

Tables 1 through 5 of this publication contain statistics for the entire United States. Because not all law enforcement agencies provide data for complete reporting periods, estimated crime counts are included in these presentations. Offense estimation occurs within each of three areas: Metropolitan Statistical Areas, "other cities," and rural counties. Using the known crime experiences of similar areas within a state, the estimates are computed by assigning the same proportional crime volumes to nonreporting agencies.

Estimates shown in Tables 1 and 4 have been adjusted due to changes in reporting practices for Chicago, Illinois. Since, in 1983, that city's prior procedures were determined not to be in accordance with established national UCR standards, adjustments through estimation were made for earlier years. Crime Index figures for Chicago were deducted from each year's United States total and revised figures were established as if no reports were received. Those crime volumes were then reincorporated to establish

new national estimates. As the Chicago Police Department changed its internal procedures to meet UCR guidelines during 1983, 1984 data were, again, not comparable with previous submissions. To overcome any influence Chicago's figures may have had on 1984 national trends, the estimation process outlined above was reapplied. Pre-1984 annual totals in this year's publication may not, therefore, be consistent with those in previous editions.

Crime Trends

Showing fluctuations from year to year, trend statistics offer the data user an added perspective from which to study crime. Percent change tabulations in this publication are computed only for reporting units which have provided comparable data for the periods under consideration. Exclusions from trend computations are made when figures from a reporting agency are not received for comparable timeframes or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures, annexations, etc.

Care should be exercised in any direct comparisons between data in this publication and those in prior issues of *Crime in the United States*. Valid percent changes for 2, 5, and 10 years are presented in this book's tabular portions.

Recent Developments

Phase II of the comprehensive study of UCR ended in early 1985 with the production of a draft "Blueprint for the Future of the Uniform Crime Reporting Program." Major proposals in the draft report included recommendations that the Program convert to unit record reporting for offenses and arrests, that the Program's data collection be two tiered, and that structured quality assurance procedures be instituted. Concerning the two-tiered collection, level one, representing most of the Nation's law enforcement agencies, would report unit records on data elements slightly expanded from today's collection. Level two, consisting of the Nation's largest law enforcement agencies and a random sampling of the smaller agencies, would report extensive data on all crimes coming to their attention, as well as various detailed information on arrests and agency characteristics.

The study's Steering Committee reviewed the draft report at a March, 1985, meeting and made various recommendations for revision. The Committee's members, however, endorsed the report's concepts.

The eighth National UCR Conference was held April 8-12, 1985, at the FBI Academy, Quantico, Virginia. Conference attendees, which included representatives from the state UCR Programs, the IACP, and the NSA, discussed the draft "Blueprint" with staff members from the national UCR Program, Bureau of Justice Statistics, and Abt Associates Inc., the private research firm conducting the study. Various procedural and methodological concerns of the attendees were addressed, and various recommendations for consideration in the final report were set forth. The overall concept for the revised Program was unanimously approved by all attendees, and the joint IACP/NSA Committee on UCR issued a resolution enthusiastically endorsing the "Blueprint."

The final report addressing or incorporating recommendations of the Steering Committee and National Conference attendees should be released for public comment in the summer of 1985.

one
PROPERTY CRIME
every 3 seconds

- one BURGLARY every 11 seconds
- one LARCENY-THEFT every 5 seconds
- one MOTOR VEHICLE THEFT every 31 seconds

The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

SECTION II
CRIME INDEX OFFENSES REPORTED

MURDER AND NONNEGLIGENT MANSLAUGHTER

DEFINITION

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

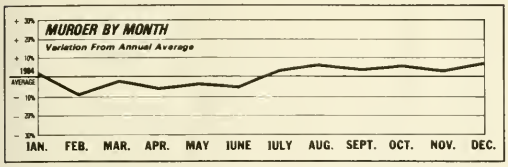
The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1983	*19,308*	*8.3*
1984	*18,692*	*7.9*
Percent change	−3.2	−4.8

Volume

The 1984 estimated national murder total was 18,692. Murder offenses occurred more frequently in December than in any other month of the year and least often in February.



The South, the most populous region, accounted for 43 percent of the murders. The Western States reported 21 percent; the Midwestern States, 19 percent; and the Northeastern States, 17 percent.

Murder by Month, 1980-1984

[Percent of annual total]

Months	1980	1981	1982	1983	1984
January	7.8	8.8	8.3	8.4	8.3
February	7.3	7.8	7.5	7.6	7.5
March	7.2	8.4	8.1	8.4	8.1
April	7.4	7.9	7.9	8.0	7.9
May	8.0	8.4	8.8	8.3	8.0
June	8.5	8.4	8.4	7.6	7.8
July	9.5	8.8	8.8	8.9	8.6

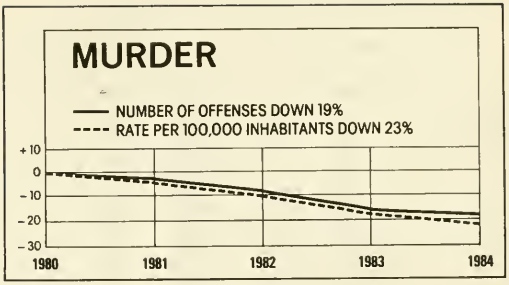
October	8.3	8.0	8.2	8.4	8.8
November	8.1	7.9	7.5	7.8	8.6
December	8.8	8.6	9.0	9.0	9.0

Trend

There were 3 percent fewer murders reported nationwide in 1984 than in 1983. For the same 2-year period, the murder volume dropped 5 percent in cities and 2 percent in rural counties, while the number in suburban counties rose 3 percent. Upward trends were registered for only two population groupings. Cities with populations from 100,000 to 249,999 recorded a 5-percent increase, and those with from 500,000 to 999,999 inhabitants recorded a 2-percent rise.

Three of the four geographic regions registered declines in the number of murders during 1984. The decreases were 7 percent in both the Midwestern States and Northeastern States and 2 percent in the Southern States. In the Western States, the only region showing an increase, the volume of murders rose 1 percent.

The accompanying chart reveals a decrease of 19 percent nationally in the murder counts from 1980 to 1984.



Rate

The 1984 national murder rate of 8 per 100,000 inhabitants was 5 percent lower than in 1983. When the number of murder victims was related to the populations on a regional basis, rate decreases were seen in all four regions, 1983 versus 1984. The Southern States averaged 10 murders per 100,000 people, 4 percent lower than in 1983, while the Western States' rate of 8 per 100,000 declined 1 percent. Each registering murder rates of 6 per 100,000, the Northeastern States' rate was down 7 percent and the Midwestern States', down 6 percent.

Collectively, the MSAs reported a murder rate of 9 victims per 100,000 inhabitants; the rural counties and cities outside metropolitan areas each registered murder rates of 5 per 100,000.

Nature

Contributing agencies provided supplemental information for 16,689 of the estimated 18,692 murders in 1984. Submitted monthly, the data consist of the age, sex, race, and ethnic origin of both victims and offenders; the types of weapons used; the relationships of victims to the offenders; and the circumstances surrounding the murders.

Based on these supplemental data, approximately 75 percent of the murder victims in 1984 were males. Ninety-five percent were persons 15 years of age or older, with 46 percent aged 20 through 34 years. Considering victims for whom race was known, an average of 57 of every 100 were white, 41 were black, and the remainder were persons of other races. Nineteen percent of the victims for whom ethnicity was reported were Hispanic.

An examination of incidents involving one victim and one offender showed that in 1984, 94 percent of the black murder victims were slain by black offenders, and 89 percent of the white murder victims were killed by white offenders. Likewise, males were most often slain by males (83 percent in single victim/single offender situations). These same data showed, however, that 9 of every 10 female victims were murdered by males.

Firearms were the most frequently used murder weapons during 1984. Handguns were used in 44 percent of the murders, shotguns in 7 percent, rifles in 5 percent, and other or unknown types of firearms in 4 percent. Collectively, firearms were used in about 3 of every 5 murders for the year.

Among the remaining incidents, cutting or stabbing instruments were employed in 21 percent; other dangerous weapons such as blunt instruments, poison, explosives, etc., in 13 percent; and personal weapons (hands, fists, feet, etc.) in 7 percent.

Supporting the philosophy that murder is primarily a societal problem over which law enforcement has little or no control is the fact that 57 percent of the murders committed in 1984 were perpetrated by relatives or persons acquainted with the victims. Eighteen percent of all killings involved family relationships, 48 percent of which involved spouse killing spouse.

Arguments resulted in 40 percent of all murders, while 18 percent occurred as a result of felonious activities such as robbery, arson, etc. Another 3 percent were suspected to have been the result of some felonious activity. The table on the following page shows murder circumstances/motives for the past 5 years.

Circumstance by Relationship, 1984

Clearances

In 1984, the highest Crime Index clearance rate nationwide was for murder, 74 percent. City agencies also cleared 74 percent of murders, with cities under 10,000 in population reporting the most successful clearance rate, 82 percent. Seventy-seven percent of murders in rural counties and 72 percent of those in suburban counties were cleared.

Regionally, the murder clearance rate was highest in the Southern States, 76 percent. Following were the Northeastern States with 74 percent, the Midwestern States with 72 percent, and the Western States with 71 percent.

Persons under 18 years of age were involved in murder less often than in any other offense in 1984. They accounted for 5 percent of the willful killings cleared by law enforcement nationally, as well as in cities and in suburban counties. Four percent of the rural county clearances involved only persons in this young-age group.

Persons Arrested

Overall murder arrests decreased 5 percent in 1984 from the 1983 volume. Arrests of persons under age 18 dropped 6 percent, while those of persons aged 18 and over fell 5 percent. During the same 2-year period, both male and female arrests were down, 5 and 3 percent, respectively.

Among all 1984 murder arrestees, 41 percent were under 25 years of age, with 7 percent of the total being 17 or younger. The 18- to 24-year age group showed the greatest involvement in this offense, accounting for 34 percent of the total 1984 murder arrests.

Whites comprised 54 percent of the total arrestees for murder in 1984. Blacks made up 45 percent, and the remainder were of other races. Sixteen percent of the arrestees were of Hispanic ethnicity.

Long-term murder arrest trends indicate total arrests fell 15 percent from 1975 and 7 percent from 1980.

FORCIBLE RAPE

DEFINITION

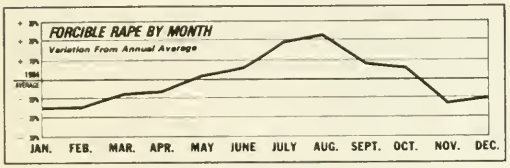
Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1983	*78,918*	*33.7*
1984	*84,233*	*35.7*
Percent change	+ 6.7	+ 5.9

Volume

An estimated 84,233 forcible rapes were reported to law enforcement agencies in 1984. The forcible rape volume comprised 7 percent of the violent crimes and 1 percent of the total Crime Index. Geographically, the South, the region with the largest population, recorded 36 percent of the 1984 forcible rape volume. The Western States accounted for 24 percent, the Midwestern States for 23 percent, and the Northeastern States for the remainder.



The largest forcible rape volumes were reported in the summer months. August recorded the highest count, while the lowest totals were registered in January and February.

Forcible Rape by Month, 1980-1984

[Percent of annual total]

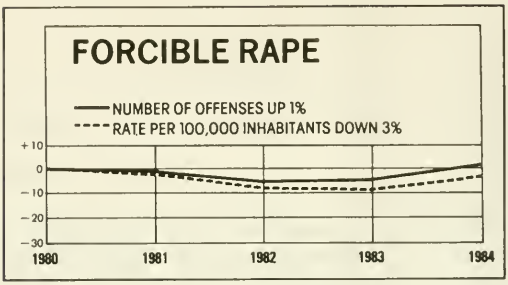
Months	1980	1981	1982	1983	1984
January	7.4	7.2	7.1	7.3	7.1
February	6.6	7.2	7.2	6.9	7.1
March	7.4	7.9	8.0	7.6	7.6
April	7.7	8.0	8.0	7.9	7.7
May	8.7	8.6	9.0	8.5	8.6
June	9.3	9.5	9.3	8.8	8.9
July	10.5	10.1	10.2	9.9	9.9
August	10.5	9.7	10.0	10.4	10.2
September	9.4	8.7	8.6	9.1	9.1
October	8.1	8.3	8.3	8.7	9.0
November	7.5	7.6	7.2	7.7	7.2
December	6.8	7.2	7.2	7.1	7.5

Trend

Forcible rapes reported to law enforcement agencies nationwide increased 7 percent in 1984 from the 1983 experience. Comparisons for 5- and 10-year periods show the 1984 national forcible rape figure up 1 percent above the 1980 level and 50 percent above the 1975 volume.

City and suburban county law enforcement agencies each recorded an increase of 6 percent in their forcible rape volumes, while rural counties registered a rise of 15 percent. By city population grouping, those having 500,000 to 999,999 inhabitants reported the greatest increase, 10 percent.

Trends for the geographic areas showed increases in all regions. As compared to 1983 volumes, the number of forcible rapes reported in 1984 rose 11 percent in the South, 8 percent in the Northeast, 7 percent in the Midwest, and 1 percent in the West.



Rate

By Uniform Crime Reporting definition, the victims of forcible rape are always female. An estimated 69 of every 100,000 females in the Nation were reported rape victims in 1984. Although 3 percent lower than in 1980, the 1984 rate was 5 percent higher than the 1983 figure when based on the United States female population.

In MSAs, the 1984 female forcible rape rate was 79 victims per 100,000 females; in cities outside metropolitan areas, it was 40 per 100,000 females; and in rural counties, it was 34 per 100,000 females.

The geographic regions recorded rates per 100,000 females ranging from 87 in the West to 53 in the Northeast. The Southern States showed a female forcible rape rate of 73, and the Midwestern States, 64.

Nature

Rapes by force comprised 79 percent of the offenses reported in this category during 1984; attempts or assaults to commit forcible rape made up the remainder. Rapes by force rose 8 percent over the 1983 experience, while attempts to commit rape increased 1 percent.

Forcible rape, a violent crime against the person, is still recognized as one of the most underreported of all Index crimes. Victims' fear of their assailants and their embarassment over the incidents are just two factors which can affect their decisions to contact law enforcement.

Clearances

In 1984, the Nation's law enforcement agencies reported 54 percent of the known forcible rapes cleared by arrest or exceptional means. Rural county agencies recorded a 63-percent clearance rate; those in the suburban counties, a 56-percent clearance rate; and city agencies, a 52-percent rate. Regionally, clearances for this offense ranged from 58 percent in the Southern States to 48 percent in the

Midwestern States. The Northeastern States' clearance rate was 56 percent, while the Western States' was 49 percent.

Of the total clearances for forcible rape in the country as a whole, 10 percent involved only persons under 18 years of age. The Nation's cities, as well as the suburban counties, also recorded 10 percent involvement of this age group, whereas the rural counties reported 8 percent.

Persons Arrested

Arrests for forcible rape increased 8 percent in 1984 over the 1983 experience. The number of arrests for this offense rose 7 percent in the Nation's cities, 10 percent in the suburban counties, and 8 percent in rural counties.

For the 5-year period, 1980 to 1984, these arrests were up 18 percent. Arrests of persons under 18 years of age increased 25 percent, and adult arrests rose 17 percent during this same timeframe.

Persons under the age of 25 accounted for 47 percent of the forcible rape arrests in 1984, with 31 percent of the arrestees in the 18- to 24-year age group. Fifty-three percent of those arrested were white, 46 percent were black, and all other races comprised the remainder. Eleven percent of the forcible rape arrestees in 1984 were Hispanic.

ROBBERY

DEFINITION

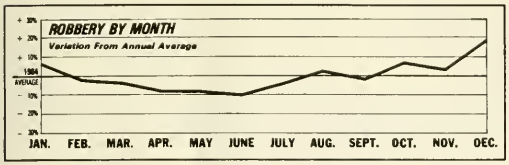
Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1983	*506,567*	*216.5*
1984	*485,008*	*205.4*
Percent change	– 4.3	– 5.1

Volume

Estimated at 485,008 offenses in 1984, robbery comprised 4 percent of all Index crimes and 38 percent of the violent crimes. The highest robbery counts were recorded in December, while the lowest occurred in June.



Geographically, the highest proportion of all robberies (30 percent) occurred in the Northeastern States. The Southern States accounted for 27 percent of the total; the Western States for 22 percent; and the Midwestern States for 21 percent.

Robbery by Month, 1980-1984

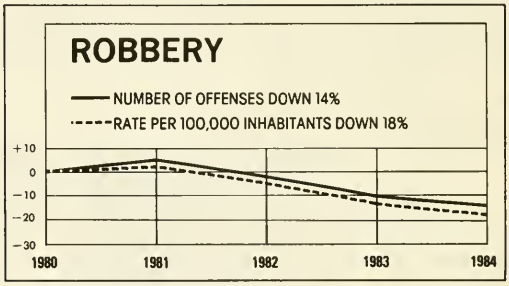
[Percent of annual total]

Months	1980	1981	1982	1983	1984
January	8.0	9.0	9.1	9.5	8.9
February	7.2	8.1	8.2	8.1	8.2
March	7.3	8.0	8.0	8.3	8.1
April	7.0	7.3	7.5	7.6	7.6
May	7.6	7.5	7.5	7.4	7.6
June	7.9	7.7	7.7	7.4	7.5
July	8.7	8.3	8.4	7.9	7.9
August	9.5	8.7	8.5	8.6	8.5
September	8.8	8.2	8.3	8.4	8.2
October	8.9	8.8	8.5	8.8	9.0
November	9.0	8.6	8.4	8.8	8.6
December	10.1	9.6	9.8	9.2	9.9

Trend

Nationally, the number of robberies in 1984 decreased 4 percent from the 1983 level. By region, robbery volumes were down 8 percent in the Northeast, 3 percent in the South and Midwest, and 1 percent in the West. City law enforcement agencies recorded a 5-percent decline; those in suburban counties, a 4-percent decrease; and those in rural counties, a 9-percent drop.

The accompanying chart depicts the trend in the volume of robbery, as well as the robbery rate, for the years 1980-1984. In 1984, the number of robbery offenses was 14 percent lower than in 1980 but 3 percent above the 1975 total.



Rate

The 1984 national robbery rate of 205 per 100,000 inhabitants was down 5 percent from the 1983 rate. With 958 robberies per 100,000 people, the highest rate was experienced in cities with populations over 1 million. MSAs recorded a rate of 262 robberies per 100,000 inhabitants, and in cities outside metropolitan areas, the rate was 44. The lowest incidence was in the rural areas where the rate was 15 per 100,000 people.

Robbery occurred most frequently in the Northeastern States where the rate was 289 per 100,000 inhabitants. The rate per 100,000 inhabitants for the Western States was 233; for the Midwestern States, 170; and for the Southern States, 163.

Nature

Accounting for a total estimated loss of $295 million in 1984, the value of property stolen due to robberies averaged $609 per incident. The impact of this violent crime on its victims cannot be measured in terms of monetary loss alone. While the object of a robbery is to obtain money or property, the crime always involves force or threat of force, and many victims suffer serious personal injury.

As in previous years, robberies on streets or highways accounted for more than half of the offenses in this category. The average dollar loss for this type of robbery was $430. Although accounting for only 1 percent of all robberies, those of banks registered the highest average loss, $2,690 per incident.

Robbery, Percent Distribution, 1984

Miscellaneous	11.8	9.8	12.3	15.1	15.2	18.4	19.3

[1]Because of rounding, percentages may not add to totals.

Forty-one percent of all robberies in 1984 were committed through the use of strong-arm tactics. Firearms were used in 36 percent, knives or cutting instruments in 13 percent, and other weapons in the remainder.

Convenience store robberies fell 40 percent in volume for the 5-year period, 1980 versus 1984. During the same timespan, robberies of gas and service stations were down 33 percent; those of banks dropped 18 percent; and those of other commercial establishments declined 29 percent. Also down in number were street robberies (8 percent) and residential robberies (12 percent).

Clearances

During 1984, 26 percent of the robbery offenses reported to law enforcement were cleared. Rural law enforcement agencies registered the highest robbery clearance rate, 40 percent. Suburban county agencies cleared 30 percent and those in cities, 25 percent. Clearance percentages for robbery in the Nation's regions showed the Southern States with 28 percent, the Western and Northeastern States each with 26 percent, and the Midwestern States with 22 percent.

Nationally, as well as for city law enforcement agencies, persons under the age of 18 were the offenders in 13 percent of all 1984 robbery clearances. This age group accounted for 12 percent of the suburban county clearances and 7 percent of the rural county clearances.

Persons Arrested

When the total number of arrests for robbery during 1984 was compared with that of 1983, a decrease of 6 percent was observed for the Nation and for suburban county law enforcement agencies. Declines were also recorded in the cities and rural counties, 5 and 19 percent, respectively.

During 1984, 67 percent of the persons arrested for robbery were under 25 years of age, and 93 percent were male. Sixty-one percent of those arrested were black, 37 percent were white, and the remainder were of other races. Fourteen percent of the robbery arrestees were Hispanic.

When compared with the 1980 total, robbery arrests showed a decrease of 5 percent in 1984. Adult arrests were up 2 percent during this period, while those of persons under age 18 decreased 19 percent.

AGGRAVATED ASSAULT

DEFINITION

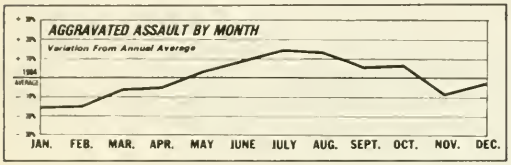
Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1983	*653,294*	*279.2*
1984	*685,349*	*290.2*
Percent change	+4.9	+3.9

Volume

Totaling an estimated 685,349 nationally in 1984, aggravated assaults occurred most frequently in the Southern States. This most populous region reported 37 percent of all aggravated assaults and was followed by the Western States with 23 percent, the Midwestern States with 21 percent, and the Northeastern States with 19 percent.



As in previous years, the highest volume of aggravated assaults occurred in the summer months of 1984.

Aggravated Assault by Month, 1980-1984

[Percent of annual total]

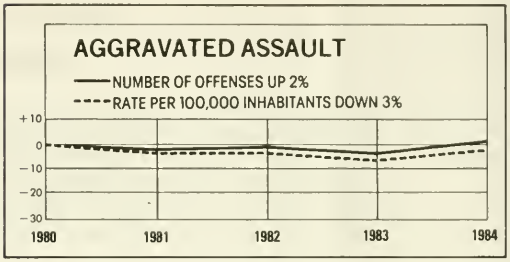
Months	1980	1981	1982	1983	1984
January	6.9	7.4	7.3	7.7	7.0
February	6.6	7.1	7.1	7.1	7.0
March	7.6	8.0	8.1	7.9	7.8
April	7.7	8.2	8.3	8.1	7.9
May	8.9	8.7	9.0	8.9	8.7
June	9.6	9.1	9.2	8.9	9.1
July	10.3	9.4	9.7	9.8	9.6
August	10.4	9.4	9.0	9.7	9.5
September	8.9	8.6	8.7	8.9	8.8
October	8.0	8.5	8.5	8.5	8.9
November	7.7	7.7	7.4	7.4	7.6
December	7.4	7.9	7.7	7.3	8.1

Trend

Nationwide, aggravated assault increased 5 percent in volume during 1984 as compared to 1983. For this 2-year period, the trend in all geographic regions showed increases. The total in the Midwestern States rose 6 percent; in the Southern States, 5 percent; and in both the Northeastern States and Western States, 4 percent.

City law enforcement agencies recorded a rise of 5 percent in their aggravated assault counts from 1983 to 1984. Those in rural counties and suburban counties experienced 4- and 3-percent increases, respectively.

The 5-year trend, 1984 over 1980, showed an increase of 2 percent in the aggravated assault volume.



Rate

During 1984, 290 victims of aggravated assault were reported for every 100,000 United States inhabitants. In metropolitan areas, the aggravated assault rate was 327 per 100,000 inhabitants; in cities outside metropolitan areas, it was 243; and in rural counties, it was 124.

Nationwide, the rate for aggravated assault increased 4 percent from 1983 but was down 3 percent from 1980.

Nature

Thirty-one percent of the aggravated assaults reported in 1984 were committed with blunt objects or other dangerous weapons. Twenty-five percent were committed with personal weapons such as hands, fists, and feet; 23 percent with knives or other cutting instruments; and 21 percent with firearms.

From 1983 to 1984, aggravated assaults committed with firearms rose 4 percent, while those assaults with knives or other cutting instruments and personal weapons increased 2 percent. Assaults where blunt objects or other dangerous weapons were used showed a rise of 9 percent.

The following table shows the 1984 regional experience of aggravated assault by type of weapon used.

Aggravated Assault, Type of Weapon Used, 1984

[Percent distribution]

Region	Total all weapons[1]	Firearms	Knife or other cutting instrument	Other weapons (club, blunt objects, etc.)	Personal weapons
Total	100.0	21.1	23.2	30.7	25.0
Northeastern States	100.0	13.6	24.6	31.9	29.9
Midwestern States	100.0	21.8	22.2	32.2	23.9
Southern States	100.0	25.3	24.7	28.9	21.0
Western States	100.0	20.5	20.6	31.3	27.7

[1]Because of rounding, percentages may not add to totals.

Clearances

Collectively, all law enforcement agencies nationwide cleared 61 percent of the reported cases of aggravated assault during 1984. The rural counties and cities with populations under 10,000 recorded the highest clearance rates, 69 percent each. Suburban county law enforcement agencies cleared 64 percent.

Regionally, clearance percentages for aggravated assault were 64 percent in the Southern States, 61 percent in both the Western and Northeastern States, and 55 percent in the Midwestern States.

Nine percent of the clearances reported nationally and by city and suburban county agencies were of offenses in which only persons under age 18 were identified as the assailants. Persons under 18 years of age accounted for 6 percent of the rural county aggravated assault clearances.

Persons Arrested

The estimated 300,860 persons arrested for aggravated assault in 1984 represented 61 percent of all arrestees for violent crimes. Total arrests for this offense were up 2 percent from the 1983 total as were those of males. Female arrests increased 4 percent for the same 2-year period.

A comparison of 1980 and 1984 figures showed total arrests for aggravated assault up 8 percent. Arrests of persons 18 years of age and over rose 11 percent, while the number of arrests of persons under age 18 decreased 8 percent.

In 1984, arrests of males for this offense outnumbered those of females by 6 to 1. Whites comprised 61 percent of the arrestees for aggravated assault; blacks, 38 percent; and all other races, the remainder. Eighty-six percent of the arrestees were non-Hispanic.

BURGLARY

DEFINITION

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

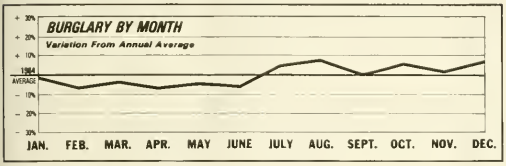
TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1983	*3,129,851*	*1,337.7*
1984	*2,984,434*	*1,263.7*
Percent change	−4.6	−5.5

Volume

The nearly 3 million burglary offenses in 1984 accounted for 1 of every 4 Crime Index offenses reported for the year. The Southern States, the most populous region, recorded 35 percent of all reported burglaries. The Western States accounted for 26 percent, the Midwestern States for 22 percent, and the Northeastern States for 18 percent.

Burglary occurred most frequently in December of 1984.



Burglary by Month, 1980-1984

[Percent of annual total]

Months	1980	1981	1982	1983	1984
January	8.0	8.8	8.4	9.1	8.3
February	7.2	8.2	7.7	7.8	7.9
March	7.9	8.6	8.4	8.5	8.0
April	7.6	7.9	7.9	7.9	7.8
May	8.1	7.9	7.9	8.1	8.0
June	8.1	8.0	8.3	7.8	7.8
July	9.0	8.6	8.8	8.5	8.7
August	9.2	8.7	8.8	9.0	8.9
September	8.6	8.2	8.3	8.4	8.3
October	8.6	8.3	8.3	8.5	8.8
November	8.4	8.1	8.3	8.3	8.4
December	9.3	8.5	8.9	8.1	9.0

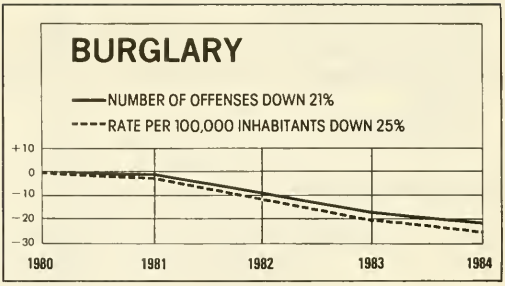
Trend

National, city, and rural county burglary counts dropped 5 percent in 1984 from 1983 totals. In the suburban counties, burglary decreased 3 percent. Five-year trends showed the 1984 total volume 21 percent lower than in 1980.

Burglary decreases were recorded in all regions, 1983 versus 1984. The declines were 11 percent in the Northeast, 7 percent in the Midwest, 2 percent in the South, and 1 percent in the West.

Rate

Down 6 percent from 1983 and 25 percent lower than in 1980, the 1984 burglary rate was 1,264 per 100,000 inhabitants nationwide. Metropolitan areas registered a rate of 1,424 for every 100,000 in population, while the cities outside metropolitan areas recorded a rate of 967 per 100,000. The rural counties showed the lowest rate, 610 per 100,000 inhabitants.



Geographically, the burglary rate was 1,629 in the Western States, 1,298 in the Southern States, 1,104 in the Midwestern States, and 1,056 in the Northeastern States. Declining in all regions, 1983 versus 1984, the rate was down 11 percent in the Northeastern Region, 7 percent in the Midwestern Region, 4 percent in the Southern Region, and 3 percent in the Western Region.

Nature

Two of every 3 burglaries in 1984 were residential in nature. The overall residential burglary volume dropped 4 percent from 1983, with nighttime offenses down 7 percent and those committed during the day down 1 percent.

The number of nonresidential burglaries recorded was 6 percent lower in 1984 than in 1983. Those occurring at night fell 9 percent in volume, and those during the day decreased less than 1 percent.

Seventy percent of the burglaries in 1984 involved forcible entry, 21 percent were unlawful entries (without force), and the remainder were forcible entry attempts.

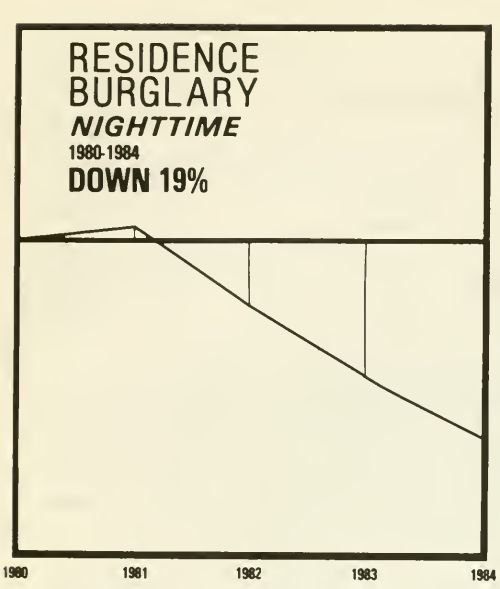
Burglary victims suffered losses estimated at $2.7 billion in 1984, and the average dollar loss per burglary was $900. The average loss for residential offenses was $927, while for nonresidential property, it was $846.

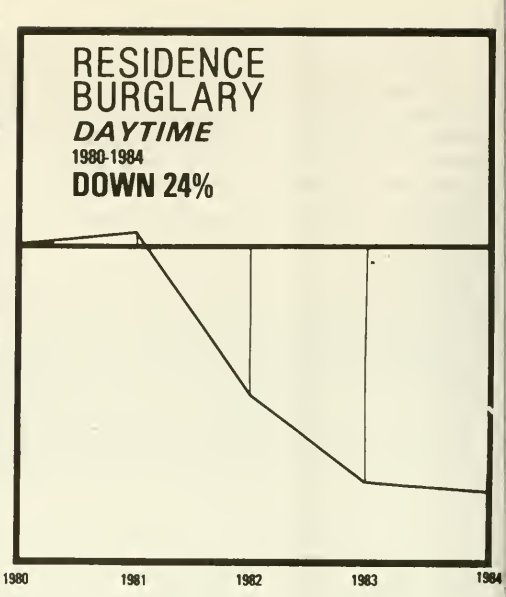
Clearances

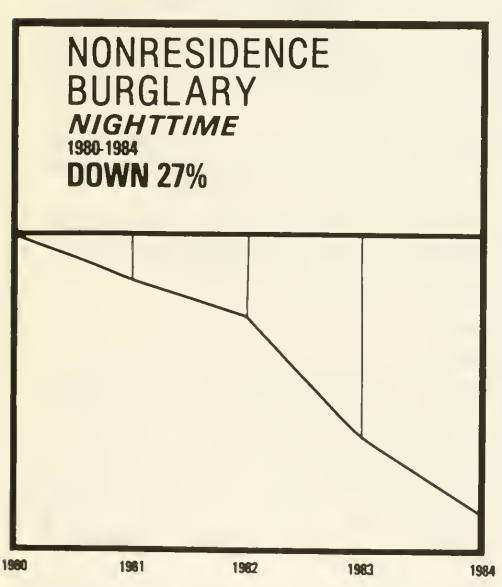
The 1984 national burglary clearance rate was 14 percent. By region, the Southern States showed a 16-percent clearance rate; the Northeastern and Western States, 14 percent each; and the Midwestern States, 12 percent.

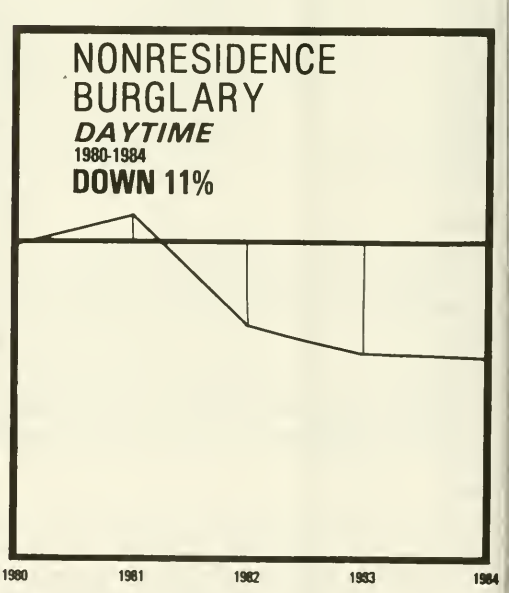
Law enforcement agencies in rural counties cleared 18 percent of the burglaries brought to their attention. Those in the suburban counties recorded a clearance rate of 16 percent, and agencies in cities obtained clearances in 14 percent of these crimes.

Adults were involved in 78 percent of all burglary offenses cleared, and only young people under 18 years of age were offenders in the remaining 22 percent. Similar to the national experience, persons under age 18 accounted for









BURGLARIES OF UNKNOWN TIME OF OCCURRENCE ARE NOT INCLUDED.

22 percent of the burglary clearances in cities and in rural and suburban counties. The highest degree of juvenile involvement in burglary was recorded in the Nation's smallest cities (under 10,000 population) where young persons under 18 years of age comprised 29 percent of the clearances.

Persons Arrested

In the UCR Program, several persons may be arrested in connection with the clearance of one crime, or the arrest of one individual may clear numerous offenses. The latter is often true in cases of burglary for which an estimated 433,600 arrests were made in 1984. Arrest trends for 1983 and 1984 show an 8-percent decrease in total burglary arrests, with those of persons under 18 years of age down 10 percent and those of adults down 7 percent. In 1984, burglary arrests dropped 9 percent in the rural counties, 8 percent in the Nation's cities, and 6 percent in the suburban counties.

Ninety-three percent of the burglary arrestees during 1984 were males and 74 percent were under 25 years of age. Of the total burglary arrestees, whites accounted for 70 percent, blacks for 29 percent, and other races for the remainder. Eighty-seven percent of the persons arrested for burglary were non-Hispanic.

LARCENY-THEFT

DEFINITION

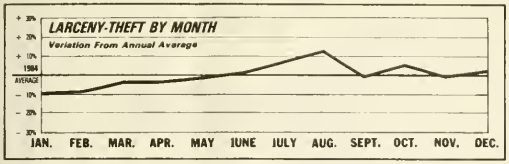
Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1983	*6,712,759*	*2,868.9*
1984	*6,591,874*	*2,791.3*
Percent change	– 1.8	– 2.7

Volume

The estimated 6.6 million larceny-thefts occurring in 1984 comprised 55 percent of the Crime Index total and 62 percent of all property crimes. This high-volume crime occurred most frequently in August and least often during January.



Geographically, the Southern States, the most populous region, reported 33 percent of the larceny-theft total. The Western States recorded 25 percent; the Midwestern States, 24 percent; and the Northeastern States, 18 percent.

Larceny-Theft by Month, 1980-1984

[Percent of annual total]

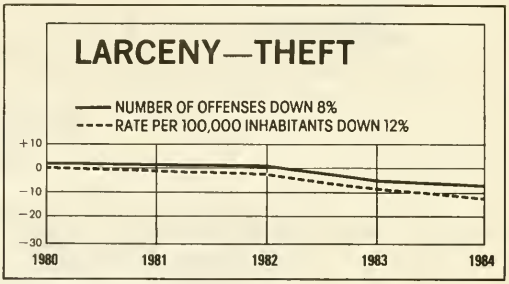
Months	1980	1981	1982	1983	1984
January	7.3	7.6	7.1	8.1	7.5
February	6.9	7.4	7.1	7.4	7.6
March	7.8	8.3	8.0	8.4	8.0
April	8.1	8.1	7.9	8.1	8.0
May	8.6	8.2	8.3	8.4	8.2
June	9.0	8.6	8.9	8.5	8.4
July	9.4	9.1	9.2	8.9	9.0
August	9.6	9.3	9.4	9.4	9.4
September	8.6	8.4	8.6	8.4	8.3
October	8.6	8.7	8.7	8.6	8.9
November	7.9	8.1	8.2	8.0	8.2
December	8.3	8.2	8.5	7.7	8.5

Trend

Compared to the 1983 experience, the 1984 volume of larceny-thefts dropped 2 percent in the Nation, as well as in all cities collectively. The suburban and rural counties also showed decreases, 3 percent and 4 percent, respectively.

Decreases of 4 percent were recorded in both the Northeastern and Midwestern Regions. While the Western States reported a decline of 1 percent, the Southern States showed an increase of less than 1 percent in the number of larceny-theft offenses.

Volume figures for larceny-theft for the 5- and 10-year periods showed a decrease of 8 percent from the 1980 level but a 10-percent rise over the 1975 experience.



Rate

Nationally, the larceny-theft rate was 2,791 per 100,000 inhabitants, a decrease of 3 percent from the 1983 rate and 12 percent lower than in 1980.

The 1984 larceny-theft rate was 3,121 per 100,000 inhabitants in MSAs; 2,988 per 100,000 population in cities outside metropolitan areas; and 905 per 100,000 in the rural counties.

Geographically, the Western States reported the highest 1984 rate with 3,477 larceny offenses per 100,000 inhabitants. The Southern States had a rate of 2,729; the Midwestern States, 2,683; and the Northeastern States, 2,376. All regions recorded decreases in 1984 from the 1983 level. Rates for both the Northeastern and Midwestern Regions dropped 4 percent, while the Western and Southern Regions showed declines of 3 and 1 percent, respectively.

Nature

For each reported larceny-theft offense in 1984, the average value of property stolen was $376. When the average value was applied to the estimated number of larceny-thefts, the loss to victims nationally was $2.5 billion for the year. This estimated dollar loss is considered conservative since many offenses in the larceny category, particularly if the value of the stolen goods is small, never come to law enforcement attention. Losses in 29 percent of the thefts reported to law enforcement ranged from $50 to $200, while in 34 percent, they were over $200.

In 1984, the average value of goods and property reported stolen from motor vehicles was $399, while thefts of motor vehicle accessories resulted in average losses of $273 per incident. Thefts by pocket-picking averaged $239 and by purse-snatching, $181. The average value loss for bicycle theft was $162 per incident; for thefts from coin-operated machines, $114; and for miscellaneous thefts from buildings, $556.

From coin-operated machines	.9	.6	.7	1.1	.9
All others	22.5	16.3	25.2	25.8	19.9

[1]Because of rounding, percentages may not add to totals.

As in prior years, a large portion of the larcenies (37 percent) was comprised of thefts of motor vehicle parts, accessories, and contents. Other major types of thefts which contributed to the high volume of these crimes were those from buildings, 16 percent; shoplifting, 13 percent; and bicycles, 8 percent. The remainder were distributed among pocket-picking, purse-snatching, thefts from coin-operated machines, and miscellaneous types of larceny-thefts. The accompanying table presents the distribution of larceny-theft by type and geographic region.

Clearances

Twenty percent of the reported larceny-thefts nationwide and in cities were cleared in 1984. Law enforcement agencies in cities from 25,000 to 49,999 in population reported the highest clearance rate, 24 percent, while those in suburban and rural counties recorded 18- and 17-percent rates, respectively.

Geographically, clearance percentages of 21 percent in the Western Region, 20 percent in both the Southern and the Midwestern Regions, and 18 percent in the Northeastern Region were recorded.

Twenty-four percent of the national clearances for larceny-theft involved persons under 18 years of age exclusively. Twenty-five percent of the clearances in cities, 22 percent of those in suburban counties, and 17 percent of those in rural counties were accounted for by persons of this young age group.

Persons Arrested

The 1984 larceny-theft arrest volume was 2 percent lower than in 1983. Arrests of males were also down 2 percent, while those of females decreased 1 percent. During the same 2-year period, adult arrests dropped 3 percent, but arrests of persons under age 18 rose 1 percent. For the 5-year period, 1980-1984, the number of persons arrested for this offense showed a 5-percent increase. Although juvenile arrests were down 9 percent, those of adults were up 14 percent.

Comprising the largest portion of the total Crime Index offenses reported, larceny-theft also accounted for 55 percent of the total arrests for Index crimes in 1984. Forty-eight percent of these arrests were of persons under 21 years of age, and 34 percent of the arrestees were under 18. Females, who were arrested for this offense more often than for any other in 1984, comprised 30 percent of all larceny-theft arrestees.

Whites accounted for 68 percent of the total larceny-theft arrests and blacks for 30 percent. All other races made up the remainder. Eighty-nine percent of the arrestees were persons of non-Hispanic ethnicity.

MOTOR VEHICLE THEFT

DEFINITION

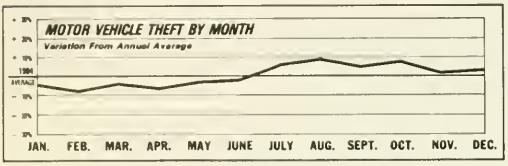
In Uniform Crime Reporting, motor vehicle theft is defined as the theft or attempted theft of a motor vehicle. This definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1983	*1,007,933*	*430.8*
1984	*1,032,165*	*437.1*
Percent change	+2.4	+1.5

Volume

The estimated 1984 national motor vehicle theft volume was 1,032,165. These offenses comprised 9 percent of all Index crimes and 10 percent of all property crimes. Regional motor vehicle theft distribution figures showed 27 percent of the total volume reported by the Southern States, 26 percent by the Northeastern States, 25 percent by the Midwestern States, and 22 percent by the Western States.



Monthly volume figures show that the greatest number of motor vehicle thefts was recorded in August, while the lowest was in February.

Motor Vehicle Theft by Month, 1980-1984

[Percent of annual total]

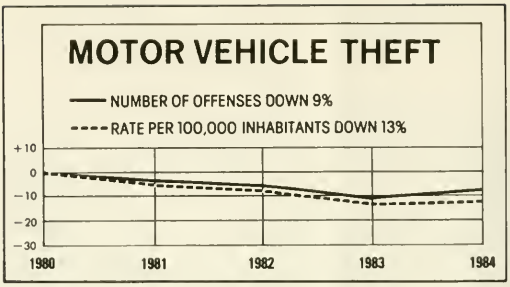
Months	1980	1981	1982	1983	1984
January	8.0	8.2	7.9	8.3	8.0
February	7.4	7.7	7.5	7.5	7.7
March	8.2	8.2	8.2	8.4	8.0
April	8.0	7.9	8.0	8.0	7.8
May	8.4	8.2	8.2	8.1	8.0
June	8.5	8.3	8.6	8.0	8.0
July	9.2	8.8	8.9	8.5	8.8
August	9.5	9.1	9.1	9.1	9.1
September	8.6	8.4	8.5	8.5	8.7
October	8.5	9.0	8.6	8.7	8.9
November	7.8	8.2	8.1	8.4	8.5
December	7.9	8.0	8.3	8.5	8.6

Trend

The number of motor vehicle thefts reported in 1984 rose 2 percent nationwide from the 1983 experience. Increases of 3 percent in the Nation's cities, 2 percent in suburban counties, and 1 percent in the rural counties were also recorded.

Regionally, the volume was up 8 percent in the Midwestern States, 5 percent in the Southern States, and 2 percent in the Western States. Only the Northeast registered a decline, 5 percent.

The accompanying chart shows that the number of motor vehicle thefts in 1984 decreased 9 percent from the 1980 volume. The volume was, however, 2 percent higher than in 1975.



Rate

Up 1 percent from the 1983 figure, the motor vehicle theft rate in 1984 was 437 per 100,000 inhabitants nationwide. Compared to the 1975 and 1980 experiences, the rate decreased 8 and 13 percent, respectively.

The motor vehicle theft rate was 533 per 100,000 MSA inhabitants. Cities outside metropolitan areas (other cities) had a motor vehicle theft rate of 183, and the rural counties recorded the lowest rate, 98. As in previous years, the highest rates were in the Nation's most heavily populated municipalities, indicating that this offense is primarily a large-city problem.

Geographically, the motor vehicle theft rates were 547 per 100,000 inhabitants in the Northeastern States; 489 in the Western States; 430 in the Midwestern States; and 344 in the Southern States. Among the regions, only the Northeast recorded a decline, 5 percent. Rate increases were 8 percent in the Midwest, 4 percent in the South, and less than 1 percent in the West.

An estimated average of 1 of every 169 registered motor vehicles was stolen nationwide in 1984. Geographically, this rate was greatest in the Northeastern Region where 1 of every 111 motor vehicles registered was stolen. The other three regions reported lesser rates — 1 per 164 in the Western States, 1 per 177 in the Midwestern States, and 1 per 222 in the Southern States.

Nature

The 1984 estimated total national loss due to motor vehicle theft was $4.6 billion. The average value per vehicle stolen was $4,418 at the time of theft.

Seventy-six percent of all motor vehicles reported stolen during the year were automobiles, 14 percent were trucks or buses, and the remainder were other types.

Motor Vehicle Theft, 1984

[Percent distribution]

Region	Total	Autos	Trucks and buses	Other vehicles
Total	100.0	75.9	14.1	10.0
Northeastern States	100.0	90.0	5.3	4.7
Midwestern States	100.0	78.9	10.8	10.3
Southern States	100.0	66.1	21.2	12.7
Western States	100.0	67.3	19.7	13.0

Clearances

Nationwide in 1984, law enforcement agencies cleared 15 percent of the motor vehicle thefts reported in their locales. Those in cities cleared 14 percent; those in the suburban counties cleared 21 percent; and rural agencies cleared 34 percent. By geographic location, clearance percentages for motor vehicle theft ranged from 9 percent in the Northeastern States to 20 percent in the Southern States. In the Midwestern and Western States, the clearance rates were 14 and 17 percent, respectively.

Persons in the under 18 age group accounted for 18 percent of the motor vehicle thefts cleared nationwide, in cities, and in suburban counties. In the rural counties, they comprised 19 percent.

Persons Arrested

The younger segment of the Nation's population accounted for the largest proportion of motor vehicle theft arrests. Fifty-six percent of all persons arrested during 1984 were under 21 years of age, and those under age 18 accounted for 36 percent of the total.

While 1984 motor vehicle theft arrests showed a 16-percent decline since 1980, they increased 3 percent from 1983. During the same 2-year period, arrests of persons under 18 years of age for motor vehicle theft were up 5 percent, and adult arrests rose 2 percent.

In 1984, 91 percent of motor vehicle theft arrestees were males. Sixty-eight percent of all persons arrested for this offense were white, 30 percent were black, and the remainder were of other races. Fourteen percent of the arrestees were Hispanic.

ARSON

DEFINITION

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

Background

Following a congressional mandate in 1979, the UCR Program initiated its collection of data on arson as a Part I Crime Index offense. Recognizing that arson has characteristics not common with other Index crimes, the data collection procedures were developed on the basis of input from the fire service and law enforcement communities, as well as the insurance industry. Specific guidelines and requirements were established for reporting arson offenses.

Unlike other Crime Index offenses, the occurrence of arson is not always immediately established by officials at the scene. Since the entire concept of the Crime Index is based on actual offenses known to law enforcement, it was decided that only fires determined through investigation to have been willfully or maliciously set, including attempts, were to be reported as arsons. Suspicious fires or those of unknown origin were to be excluded until definitely determined to be arsons.

Prior to the addition of arson as an Index crime, contributing law enforcement agencies were instructed that in multiple-offense situations only one crime, based on an established hierarchy of offenses, was to be reported. Since it was recognized that arson frequently occurs in conjunction with other Index crimes and that valuable information could be lost if this procedure was followed, the hierarchy policy was modified for arson reporting only. Therefore, it was determined that all arsons should be reported regardless of their commission in conjunction with another Crime Index offense.

Volume

A total of 101,836 arson offenses were reported by 12,371 law enforcement agencies representing approximately 89 percent of the Nation's population during 1984. Data in the tables on the accompanying pages are based on figures received from 12,150 law enforcement agencies providing complete, detailed information, including type of structure and estimated monetary value of property damaged. Although the population coverage is insufficient to estimate the total 1984 United States arson experience, additional reported data on arson offenses and trends are shown in Tables 6 through 13 and on arson clearances in Tables 20 through 23.

Trend

Based on reports from law enforcement agencies providing 6 or more months of arson data for 1983 and 1984, arson trends are shown in Tables 10 through 13. During this 2-year period, a 2-percent increase in reported arson occurred nationwide. With respect to city size, the trend ranged from a 5-percent decline in cities with 10,000 to 24,999 inhabitants to a 9-percent increase in cities with populations over 1 million. The Nation's suburban counties recorded a 4-percent drop, and the rural counties registered an 8-percent decline.

By property type, those arsons in which structures were the targets decreased 1 percent nationally. Arsons of mobile property were up 2 percent, and those of all other property rose 6 percent.

Caution is recommended when viewing arson trend information. The percent change figures may have been influenced by improved arson reporting procedures during the collection's relatively limited timespan. It is expected that year-to-year statistical comparability will improve as collection continues.

Rate

The accompanying table presents arson rates per 100,000 inhabitants. Population coverage for arson data is lower than for the other Crime Index offenses; therefore, these data were tabulated independently. Based only on figures from law enforcement agencies supplying 12 months of statistics for all Index crimes, including arson, the rates ranged from 134 per 100,000 inhabitants in cities with populations over 1 million to 20 per 100,000 rural county inhabitants. The rates for suburban counties and all cities were 40 and 61 per 100,000 inhabitants, respectively. Overall, the 1984 national arson rate was 53 per 100,000 population.

Arson Rate, Population Group, 1984

[7,779 agencies; 1984 estimated population 164,611,000: Rate per 100,000 inhabitants]

Group	Rate
Total	52.6
Total cities	60.6
Group I (cities 250,000 and over)	98.0
(cities 1,000,000 and over)	134.4
(cities 500,000 to 999,999)	67.5
(cities 250,000 to 499,999)	83.9
Group II (cities 100,000 to 249,999)	64.5
Group III (cities 50,000 to 99,999)	49.6
Group IV (cities 25,000 to 49,999)	37.9
Group V (cities 10,000 to 24,999)	28.5
Group VI (cities under 10,000)	26.8
Suburban counties	40.2
Rural counties	20.1
Suburban Area	35.9

Nature

During 1984, structures comprised 58 percent of the property targeted by arsonists. Mobile property (motor vehicles, trailers, airplanes, boats, etc.) accounted for 24 percent, and the remainder were directed at other property (crops, timber, fences, signs, etc.).

Arson, Type of Property, 1984

[12,150 agencies; 1984 estimated population 189,957,000]

Property classification	Number of offenses	Percent distribution[1]
Total	**82,338**	**100.0**
Total structure	47,736	58.0
Single occupancy residential	19,947	24.2
Other residential	8,182	9.9
Storage	4,955	6.0
Industrial/manufacturing	763	.9
Other commercial	6,149	7.5
Community/public	5,112	6.2
Other structure	2,628	3.2
Total mobile	20,036	24 3
Motor vehicles	18,304	22.2
Other mobile	1,732	2.1
Other	14,566	17.7

[1]Because of rounding, percentages may not add to totals.

Fifty-nine percent of the structural arsons in 1984 involved residential property, with 42 percent of such offenses directed at single-occupancy residences. Sixteen percent of all targeted structural property was uninhabited or abandoned at the time the arson occurred.

Motor vehicles comprised 91 percent of all mobile property at which arsons were directed.

Arson, Structures Not in Use, 1984

[12,150 agencies; 1984 estimated population 189,957,000]

Type of structure	Number of offenses	Percent not in use
Total	**47,736**	**16.0**
Single occupancy residential	19,947	20.8
Other residential	8,182	10.6
Storage	4,955	17.0
Industrial/manufacturing	763	10.1
Other commercial	6,149	9.8
Community/public	5,112	5.9
Other structure	2,628	30.3

Averaging $10,378 per incident, the reported monetary value of property damaged due to arsons in 1984 was $855 million. While industrial/manufacturing structures registered the highest average loss, $82,178 per offense, total structures averaged a loss of $16,310. Averages of $3,470 were shown for mobile properties and $444 per incident for other targets.

Arson, Monetary Value of Property Damaged, 1984

[12,150 agencies; 1984 estimated population 189,957,000]

Property classification	Number of offenses	Average damage
Total	**82,338**	**$10,378**
Total structure	47,736	16,310
Single occupancy residential	19,947	11,775
Other residential	8,182	12,143
Storage	4,955	17,000
Industrial/manufacturing	763	82,178
Other commercial	6,149	29,716
Community/public	5,112	13,226
Other structure	2,628	17,906
Total mobile	20,036	3,470
Motor vehicle	18,304	3,084
Other mobile	1,732	7,542
Other	14,566	444

Clearances

The national arson clearance rate during 1984 was 17 percent. Rural county agencies showed the highest rate, clearing 25 percent of the arson offenses brought to their attention. Suburban counties cleared 21 percent; and city law enforcement agencies, 15 percent.

Geographically, the Southern States reported a clearance rate of 22 percent; the Western States, 16 percent; the Northeastern States, 15 percent; and the Midwestern States, 13 percent.

During the year, 35 percent of all arson clearances involved only young people under age 18. This offense showed a higher percentage of juvenile involvement than any other Index crime. Persons under 18 accounted for 35 percent of the structural arson clearances, 20 percent of those for mobile property, and 56 percent for arsons of all other property.

By population grouping, juveniles were the offenders in 37 percent of the city arson clearances, 35 percent of those in suburban counties, and 21 percent of those in the rural counties. Among the city groupings, the greatest juvenile involvement was seen in cities with populations from 25,000 to 49,999, 47 percent.

The tables on the following page show clearance data only for those 12,150 law enforcement agencies which were able to furnish breakdowns by type for the structural and mobile classifications. As can be seen, the highest clearance rate (34 percent) was recorded for offenses in which community or public structures were involved, while the lowest (10 percent) was registered for motor vehicles.

Arson Offenses Cleared by Arrest,[1] 1984

[12,150 agencies[2]; 1984 estimated population 189,957,000]

Property classification	Number of offenses	Percent cleared by arrest

Other	2,708	56.5

[1]Includes offenses cleared by exceptional means.
[2]The number of agencies used in this table is lower than the number used in Tables 20-23. To be included in this table, it was necessary that arson clearances be reported by property classification.

Persons Arrested

During 1984, the estimated number of arrests for arson totaled 19,000. Forty-three percent of the arrestees were under 18 years of age and 64 percent were under 25. Males comprised 88 percent of all arson arrestees.

Of all persons arrested for this offense in 1984, 78 percent were white, 21 percent were black, and the remainder were of other races. Hispanics comprised 8 percent of the arrestees.

Trends for 1983 versus 1984 show arson arrests decreased 3 percent nationwide, 6 percent in the rural counties, and 11 percent in the suburban counties. Law enforcement agencies in the Nation's cities reported virtually no change for the 2-year period.

From 1983 to 1984 arrests of persons under the age of 18 increased 7 percent, but adult arrests dropped 9 percent nationwide. During the same period, male arrests for arson were down 2 percent and female arrests down 4 percent.

The 1984 arson arrest total for all ages decreased 7 percent from the 1980 level but was up 1 percent from the 1975 total.

CRIME INDEX TABULATIONS

Data on crime in the United States as a whole; geographic divisions; individual states; Metropolitan Statistical Areas; cities, towns, and counties; and college and university campuses are presented in this Section's tabular portions. Although the total number of actual criminal offenses occurring is unknown, the volume of crimes reported to law enforcement agencies represents an indicator of criminal activity.

Also furnished in the following tables are national averages for the value of property stolen in connection with Crime Index offenses; further breakdowns by type for the robbery, burglary, larceny-theft, and arson classifications; and data on the type and value of property stolen and recovered.

In reviewing the tables in this report, it must be remembered that many factors can cause the volume and type of crime to vary from place to place. Population, one of these factors, is used in computing crime rates; however, all communities are affected to some degree by seasonal or transient populations. Since counts of current, permanent population are used in their construction, crime rates do not account for short-term population variability. A discussion of various factors contributing to the amount of crime in a given area is shown on page *v* of this publication.

National data can serve as a guide for the law enforcement administrator in analyzing the local crime count, as well as the performance of the jurisdiction's law enforcement agency. The analysis, however, should not end with a comparison based on data presented in this publication. It is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

Note

The collection of statistics on arson as a Crime Index offense began in 1979. However, 1984 annual figures are not available for inclusion in tables presenting statistics for the total United States. Arson totals reported by individual law enforcement agencies are displayed in Tables 6 through 9. Two-year arson trends are shown in Tables 10 through 13.

Crime Index Total

The estimated 11.9 million Crime Index offenses occurring in 1984 represented a 2-percent decline from 1983. Marking the third consecutive year of decline, the 1984 total was the lowest since 1978. It was 11 percent below the 1980 level but 5 percent higher than in 1975.

Overall violent crime was up 1 percent in 1984 as compared to 1983. Among the individual offenses, murder and robbery declined, 3 and 4 percent, respectively. Forcible rape rose 7 percent and aggravated assault, 5 percent.

Collectively, the number of property crimes in 1984 was down 2 percent from the 1983 volume. Burglary decreased 5 percent and larceny-theft, 2 percent. Motor vehicle theft showed an increase of 2 percent.

Considering 5- and 10-year timeframes, the 1984 violent and property crime totals each showed declines from the 1980 figures, 5 and 12 percent, respectively. Both categories, however, registered increases as compared to 1975. Violent crime was up 22 percent and property crime, 3 percent. National estimates of volume and rate per 100,000 inhabitants for all Crime Index offenses covering the past decade are set forth in Table 1, "Index of Crime, United States, 1975-1984." Crime rates relate the incidence of reported crime to population.

Table 1. — Index of Crime, United States, 1975-1984

[1]Populations are Bureau of the Census provisional estimates as of July 1, except April 1, 1980, preliminary census counts, and are subject to change.

[2]Because of rounding, the offenses may not add to totals.

[3]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[4]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5]Annual totals for years prior to 1984 have been adjusted and may not be consistent with those in prior editions of this publication. See "Offense Estimation", pages 3 and 4 for details.

All rates were calculated on the offenses before rounding.

Table 2, "Index of Crime, United States, 1984," shows current year estimates for MSAs, rural counties, and cities and towns outside metropolitan areas (other cities). See Appendix III for the definitions of these community types.

[1]Populations are Bureau of the Census provisional estimates as of July 1, 1984, and are subject to change.
[2]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]The percentage representing area actually reporting will not coincide with the ratio between reported and estimated crime totals, since these data represent the sum of the calculations for individual states which have varying populations, portions reporting, and crime rates.

Provided in Table 3, "Index of Crime, Regional Offense and Population Distribution, 1984," are data showing the geographical distribution of estimated Index crimes and population. When utilizing figures presented on a regional basis in this publication, the reader is cautioned to consider each region's proportion of the total United States population. For example, while the Southern States accounted for the largest volume of Crime Index offenses in 1984, they also represented the greatest regional population.

Table 3. — Index of Crime, Regional Offense and Population Distribution, 1984

[1]Populations are Bureau of the Census provisional estimates as of July 1, 1983 and 1984, and are subject to change.
[2]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]The 1983 totals have been adjusted. See "Offense Estimation," pages 3 and 4, for details.
[5]Includes offenses reported by the U.S. Park Police for the District of Columbia and the Zoological Police.
Offense totals are based on all reporting agencies and estimates for unreported areas.

[1]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.
[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]Includes offenses reported by the U.S. Park Police for the District of Columbia and the Zoological Police.

Table 6. — Number of Offenses Known to the Police, Cities and Towns 10,000 and over in Population, 1984

* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

City by State	Population	Crime Index total	Modified* Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

WYOMING											
University of Wyoming	9,144	3	.....	1	1	1	190	12	177	1	.....

[1]The student enrollment figures provided by the U.S. Department of Education are for 1983, the most recent year available.
[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]Student enrollment figures are not available.
[5]At publication deadline, complete data were not available for Georgia colleges and universities. Data may now be available from the Georgia Crime Information Center at the address listed in Appendix V.

NOTE: Caution should be exercised in making any inter-campus comparisons or ranking schools, as university/college crime statistics are affected by a variety of factors. These include: demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

Table 8. — Number of Offenses Known to the Police, Suburban Counties, 1984

* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1]The number of agency reports used in arson trends is less than used in compiling trends for other Crime Index offenses. However, the number of agencies used in the arson column of this table is greater than the number used in the tables on pages 38 and 39, since it is not necessary to report arsons by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Includes state police agencies with no county breakdown.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities and counties are also included in other groups.

[1]The number of agency reports used in arson trends is less than used in compiling trends for the other Crime Index offenses. However, the number of agencies used in the arson column of this table is greater than the number used in the tables on pages 38 and 39 since it is not necessary to report arsons by property classification breakdowns to be included in this table.

[2]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities and counties are also included in other groups.

Table 14. — Crime Rates, Offenses Known to the Police, Population Group, 1984

[1]Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for other seven Crime Index offenses. Independently tabulated arson rates appear on page 37 of this publication.
[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]Includes state police agencies with no county breakdown.
[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities and counties are also included in other groups
Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

SECTION III
CRIME INDEX OFFENSES CLEARED

Law enforcement agencies clear crimes by arrest, or in some circumstances, by exceptional means. An offense is cleared by arrest when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution. Several crimes may be cleared by the arrest of one person, while the arrest of many persons may clear only one offense. Clearances by exceptional means are recorded in instances when some element beyond law enforcement control precludes the placing of formal charges against the offender. Examples of circumstances allowing exceptional clearances are the death of the offender (suicide, justifiably killed by police or private citizen, etc.); the victim's refusal to prosecute after the offender has been identified; or the denial of extradition because the offender committed another crime and is being prosecuted in a different jurisdiction. In all exceptional clearance cases, law enforcement must have identified the offender, have enough evidence to support arrest, and know the offender's location.

Twenty-one percent of the Crime Index offenses reported in 1984 were cleared by law enforcement. The overall violent crime clearance rate was 47 percent. Law enforcement agencies recorded a 74-percent clearance rate for murder, 54 percent for forcible rape, 26 percent for robbery, and 61 percent for aggravated assault. Of all property crimes reported, 18 percent were cleared. Among the individual categories, the larceny-theft clearance rate was 20 percent. For motor vehicle theft, it was 15 percent, and for burglary, 14 percent. Clearances for crimes against persons are generally higher as more intense investigative efforts are often afforded these offenses and witnesses are more frequently available to identify the perpetrators.

For arson, the eighth Index crime, the clearance rate was 17 percent. When arson was considered in the Modified Crime Index total, the overall clearance rate remained the same, 21 percent.

Regionally, the highest overall Crime Index clearance rate was recorded by the Southern States with 23 percent. Following were the Western States with 22 percent and the Northeastern and the Midwestern States with 20 percent each. In addition to registering the highest Crime Index clearance rate, the Southern States also registered the most successful violent and property crime clearance percentages, 52 and 19 percent, respectively.

City law enforcement agencies recorded clearances for 21 percent of the Crime Index offenses brought to their attention. Those in rural counties showed clearances for 22 percent and in suburban counties, 21 percent.

Percent of Offenses Cleared by Arrest[1], Region, 1984

Region	Crime Index total	Modified Crime Index total	Violent crime	Property crime	Murder and non-negligent man slaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson
United States total	21.0	21.0	47.4	17.9	74.1	53.6	25.8	61.3	14.5	19.9	15.1	16.7
Northeastern States	19.6	19.5	43.4	16.0	73.9	55.7	25.5	61.5	14.2	18.4	8.9	15.0
Midwestern States	19.5	19.5	43.4	17.3	72.0	48.5	22.2	55.3	12.2	19.8	14.1	12.7
Southern States	22.5	22.5	52.5	18.9	76.5	58.4	28.0	64.0	16.3	20.0	20.0	22.0
Western States	21.5	21.5	47.1	18.7	71.0	49.2	26.0	61.4	14.0	21.1	17.2	15.6

[1]Includes exceptional clearances.

Clearances Involving Only Persons under 18 Years of Age

One means of measuring the involvement of juveniles in crime is to identify the number of crimes in which they are offenders. Although no physical arrest may be made, a clearance by arrest can be recorded when the offender is a person under 18 years of age and is cited to appear in juvenile court or before other juvenile authorities. Twenty percent of the Crime Index offenses cleared during 1984 involved only persons under the age of 18. Persons in this same age group accounted for 10 percent of the violent crime clearances and 23 percent of those for property crimes.

The percentage of juvenile involvement was lowest for murder (5 percent) and highest for arson (35 percent). Persons in the under 18 age category accounted for 27 percent of the 1984 U. S. population.

Regionally, the largest percentage of involvement by the under 18 age group was recorded in the Midwest where they accounted for 1 of every 4 clearances. Juveniles were the offenders in 22 percent of the clearances in the Western States, 20 percent of those in the Northeastern States, and 16 percent of those in the Southern States.

[1]Includes offenses cleared by exceptional means.
[2]The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. However, the number of agencies used in the arson column for this table is greater than the number used in the clearance table on page 39, since it is not necessary to report clearances by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities and counties are also included in other groups.

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. However, the number of agencies used in the arson column for this table is greater than the number used in the clearance table on page 39, since it is not necessary to report clearances by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Table 22. — Offenses Known Breakdown and Percent Cleared by Arrest[1], Population Group, 1984

[1984 estimated population]

Population group	Forcible rape		Robbery				Aggravated assault				Burglary			Motor vehicle theft			Arson[2]		
	Rape by force	Assault to rape-attempts	Firearm	Knife or cutting instrument	Other weapon	Strong-armed	Firearm	Knife or cutting instrument	Other weapon	Hands, fists, feet, etc	Forcible entry	Unlawful entry	Attempted forcible entry	Autos	Trucks and buses	Other vehicles	Structure	Mobile	Other

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. However, the number of agencies used in the arson column for this table is greater than the number used in the clearance table on page 39, since it is not necessary to report clearances by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.

SECTION IV
PERSONS ARRESTED

Arrests are primarily an indication of law enforcement activity as it relates to crime. Although arrest practices, policies, and enforcement emphases vary from place to place and even within a community from time to time, arrest data provide a useful indication of involvement in criminal acts by the age, sex, race, and ethnic origin of the perpetrators. The volume of arrests for certain unlawful conduct such as drunkenness, disorderly conduct, vagrancy, and related violations may differ among agencies. Arrests for robbery, burglary, and other serious crimes are, however, more likely to be the result of uniform and consistent practices throughout all jurisdictions. Procedures used in this Program require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals arrested since one person may be arrested several times during the year for the same or different offenses.

Law enforcement agencies made an estimated 11.6 million arrests nationwide in 1984 for all criminal infractions except traffic violations. The arrest rate was 4,951 per 100,000 inhabitants of the total estimated United States population. Cities with populations over 250,000 showed the highest rate, 7,526 per 100,000. Suburban counties registered 3,866; and rural counties recorded 3,078 per 100,000 people.

Regionally, the highest arrest rate was in the Western States with 5,680 per 100,000 inhabitants. Following were the Southern States with 5,170, the Northeastern States with 4,907, and the Midwestern States with 3,955.

Arrest Trends

Arrests for all offenses except traffic violations showed virtually no change in 1984 from the 1983 volume. Similar to the experience for all ages, adult arrests remained at the same level for the 2-year period, while those of persons under age 18 increased 1 percent. When considering only the eight Crime Index offenses as a group, a 2-percent decline was recorded for all ages. This trend held for both the overall adult and juvenile age categories. Arrests for the Index's violent crimes showed no change, and those for property crimes were down 3 percent.

City law enforcement agencies reported virtually the same number of arrests for all offenses in 1984 as in 1983. For the same period, suburban county arrests were up 1 percent, while rural county law enforcement agencies recorded a 1-percent decline.

For the 5-year period, 1980-1984, total arrests were up 11 percent in volume. Although the arrests of persons under 18 years of age dropped 11 percent, those of persons 18 and over increased 17 percent. Crime Index arrests were down 1 percent overall and 17 percent for juveniles. Conversely, the number of adults arrested for Index crimes was up 8 percent. Total violent crime arrests rose 4 percent over the 1980 total, while property crime arrests were down 3 percent.

Arrests for drug abuse violations in 1984 were up 6 percent over the 1983 experience and 31 percent above the 1980 level. The types of drugs involved in violations resulting in arrests during 1984 are shown by geographic region in the accompanying table.

Arrests for Drug Abuse Violations

[Percent distribution]

	Total[1]	Heroin or cocaine	Marijuana	Synthetic narcotics	Other
Northeastern States	100.0	30.3	55.8	3.8	10.0
Sale/manufacture	30.0	12.2	12.3	1.5	4.0
Possession	70.0	18.1	43.5	2.3	6.0
Midwestern States	100.0	7.5	71.7	3.3	17.5
Sale/manufacture	23.9	3.0	11.5	1.3	8.2
Possession	76.1	4.5	60.2	2.0	9.3
Southern States	100.0	17.2	69.2	3.2	10.5
Sale/manufacture	21.3	5.7	11.3	1.0	3.4
Possession	78.7	11.4	57.9	2.2	7.2
Western States	100.0	40.3	43.8	.8	15.0

Age

Age distribution data for all arrestees nationwide showed that 6 percent were under the age of 15, 17 percent were under 18, 32 percent were under 21, and 51 percent were under 25. The under 25 age group accounted for 52 percent of arrests in the cities, 46 percent of those in the suburban counties, and 44 percent of those in the rural counties.

Thirteen percent of the arrestees for Crime Index offenses were under the age of 15; 31 percent were under the age of 18; 47 percent were under 21; and 63 percent, under 25. A further examination of figures on arrestees in the lower age brackets showed that persons under 25 years of age comprised 51 percent of those arrested for violent crimes and 66 percent of those arrested for property crimes.

Sex

Outnumbering women arrestees by 5 to 1, males accounted for 83 percent of all arrests, 79 percent of those for Index crimes, 89 percent of those for violent crimes, and

77 percent of those for property crimes. As shown in former years, larceny-theft was the crime for which females were most often arrested. This single offense accounted for 80 percent of arrests of women for Index crimes and 20 percent of all female arrests.

Two-year trends showed virtually no change in the number of male arrests from 1983 to 1984. Female arrests were up 1 percent during the same period.

Considering a longer timeframe, arrests of males rose 10 percent from 1980 to 1984, and female arrests were up 18 percent. Although the number of adult arrests increased for both sexes, arrests of females under age 18 fell 5 percent and those of males in the same age group dropped 12 percent for the 5-year timespan.

Arrest Rates

Arrest rates are a measure of law enforcement activity in response to crime. The accompanying table presents the Crime Index arrest rates per 100,000 inhabitants in the four geographic regions of the United States.

Arrests, Region, 1984

[Rate per 100,000 inhabitants]

Offense	United States total	Northeastern States	Midwestern States	Southern States	Western States
Murder	7.6	6.1	5.8	9.5	8.0
Forcible rape	15.8	16.1	15.1	16.3	15.2
Robbery	60.4	103.4	37.9	48.9	56.8
Aggravated assault	128.8	139.4	84.9	141.4	143.5
Burglary	185.9	159.6	139.3	194.3	247.9
Larceny-theft	561.4	466.2	545.8	549.9	692.6
Motor vehicle theft	51.9	50.0	38.3	49.5	71.2
Arson	8.2	8.0	8.0	7.1	10.2
Crime Index total[1]	1,019.8	948.8	875.1	1,016.9	1,245.3

[1]Includes arson.

Table 24.—Total Estimated Arrests[1], United States, 1984

TOTAL[2]	11,564,000
Murder and nonnegligent manslaughter	17,770
Forcible rape	36,700
Robbery	138,630
Aggravated assault	300,860
Burglary	433,600
Larceny-theft	1,291,700
Motor vehicle theft	121,200
Arson	19,000
Violent crime[3]	493,960
Property crime[4]	1,865,600
Crime Index total[5]	2,359,500
Other assaults	527,000
Forgery and counterfeiting	82,400
Fraud	270,700
Embezzlement	8,100
Stolen property; buying, receiving, possessing	123,100
Vandalism	245,900
Weapons; carrying, possessing, etc.	177,500
Prostitution and commercialized vice	112,200
Sex offenses (except forcible rape and prostitution)	97,800
Drug abuse violations	708,400
Opium or cocaine and their derivatives	181,800
Marijuana	419,400
Synthetic or manufactured drugs	19,000
Other dangerous nonnarcotic drugs	88,300
Gambling	34,700
Bookmaking	3,200
Numbers and lottery	8,800
All other gambling	22,700
Offenses against family and children	44,300
Driving under the influence	1,779,400
Liquor laws	505,500
Drunkenness	1,152,300
Disorderly conduct	665,900
Vagrancy	29,100
All other offenses (except traffic)	2,406,900
Suspicion (not included in totals)	21,300
Curfew and loitering law violations	86,600
Runaways	147,000

[1]Arrest totals based on all reporting agencies and estimates for unreported areas.
[2]Because of rounding, items may not add to totals.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault
[4]Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
[5]Includes arson.

Table 25.—Arrests, Number and Rate, Population Group, 1984

[Rate: Number of arrests per 100,000 inhabitants]

[1]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities and counties are also included in other groups.
[2]Because of rounding, the percentages may not add to total.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[4]Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
[5]Includes arson.

[2]Because of rounding, the percentages may not add to total.
[3]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities and counties are included in other groups.

Law Enforcement Code of Ethics

As a Law Enforcement Officer, *my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.*

I will *keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.*

I will *never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.*

I recognize *the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.*

SECTION V
LAW ENFORCEMENT PERSONNEL

Law Enforcement Employees

As of October 31, 1984, the number of full-time law enforcement officers averaged 2 for every 1,000 inhabitants in the United States. Representing a population of 225 million, 11,912 city, county, and state police agencies reported employing a total of 467,117 officers. Including full-time civilians, the total law enforcement employee force was 611,488 for a rate of 2.7 per 1,000 inhabitants.

Varying demographic and other jurisdictional characteristics greatly affect the requirements for law enforcement service from one locale to another. For example, the needs of a community having a highly mobile or seasonal population may be very different from those of a city whose population is relatively stable. Similarly, a small community situated between two large cities may require a greater number of law enforcement personnel than a community of the same size which has no urban centers nearby.

The functions of law enforcement are also significantly diverse throughout the Nation. In certain areas, sheriffs' responsibilities are limited almost exclusively to civil functions and/or the administration of the county jail facilities. Likewise, the responsibilities of state police and highway patrol agencies vary from one jurisdiction to another.

In view of these differing service requirements and responsibilities, care should be used when attempting any comparison of law enforcement employee rates. The rates presented in the following tables represent national averages; they should be viewed as guides or indicators, not as recommended or desirable police strengths. Adequate manpower for a specific locale can be determined only after careful study and analysis of the various conditions affecting service requirements in that jurisdiction.

City law enforcement employee averages in 1984 ranged from 2 per 1,000 inhabitants in those with populations from 25,000 to 49,999 to 3.4 for those with populations of 250,000 or more. Rural counties averaged 3.2 full-time law enforcement employees per 1,000 population, while suburban counties averaged 2.9.

Geographically, the highest law enforcement employee rate (3.2) was recorded in the South Atlantic Division. The fewest number of employees per 1,000 population (2.2) was reported by the West North Central Division.

Sworn Personnel

Rates based solely on sworn law enforcement personnel (excluding civilians) showed the national average for all cities was 2.1 officers per 1,000 inhabitants. By population grouping, the lowest average rate (1.6) was for cities with populations of 25,000 to 49,999; cities 250,000 or more in population recorded the highest rate, 2.7. Suburban county law enforcement agencies averaged 2 officers per 1,000 population, while agencies in rural counties averaged 2.2.

Males comprised 94 percent of all sworn employees throughout the Nation, as well as in the cities and rural counties. In suburban counties, males comprised 91 percent of all sworn personnel.

Civilian Employees

Nationally, 24 percent of all law enforcement employees in 1984 were civilians. Civilians comprised 30 percent of the rural law enforcement strength. In suburban counties, they represented 29 percent; and in cities, 20 percent.

Law Enforcement Officers Killed and Assaulted

Seventy-two law enforcement officers were feloniously slain in the line of duty during 1984. That annual total was lower than for any year since 1968 when records show 64 officers were slain. The highest number of officer killings was registered in 1973 when 134 officers lost their lives.

Extensive data on line-of-duty deaths and assaults on city, county, state, and Federal officers can be found in the Uniform Crime Reporting publication, *Law Enforcement Officers Killed and Assaulted.*

SECTION VI
APPENDIX I
TABLE METHODOLOGY

Designed to assist the reader, this appendix explains the construction of many tabular presentations in the book. The following key refers to the columnar headings used throughout the appendix.

Key: A) Column 1 shows the table numbers. Included are Tables 1 through 68, *Crime in the United States-1984.*

B) Column 2 indicates the level of submission necessary for an agency's statistics to be included in a table. There are three levels of participation:

1. Agencies having reported data for all 12 months of the year.
2. Agencies having reported data for at least 1 month but less than 12 months of the year.
3. Nonreporting agencies.

The tabulations presented in the publication employ statistics from one or more of the above-listed participation levels. For example, Table 2 includes all three agency reporting levels, but Table 14 presents only data for agencies having reported the entire year.

C) Column 3 explains how each table was constructed. Data adjustments, if any, are discussed along with various definitions of data aggregation.

D) Column 4 contains general comments regarding the potential use and misuse of the statistics presented.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
1	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1984 statistics are consistent with Table 2. Pre-1984 crime statistics may have been updated, and hence, may not be consistent with prior publications. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year. Population statistics represent July 1 provisional estimations for each year except April 1, 1980. The offense breakdowns are according to UCR crime definitions (App. II). Crime volume statistics are rounded to the nearest 10 for violent crime and the nearest 100 for property crime. Percent changes are computed prior to rounding.	Represents an estimation of national reported crime activity from 1975 to 1984.
2	All law enforcement agencies in the UCR Program (including those submitting less than 12 months for 1984).	Statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1984, Bureau of the Census provisional estimates. The tabular breakdowns are in accordance with UCR crime definitions (App. II) and population classifications (App. III).	Represents an estimation of national reported crime activity in 1984.
3	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1984).	Regional offense distributions are computed from volume figures as shown in Table 4. Population distributions are based on July 1, 1984, Bureau of the Census provisional estimates.	Represents the 1984 geographical distribution of estimated Crime Index offenses and population.
4	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1984 statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 1983 and 1984. Population statistics represent July 1 provisional estimates for 1983 and 1984. The offense breakdowns are according to UCR crime definitions (App. II).	Represents an estimation of reported crime activity for Index offenses at the: 1. national level 2. regional level 3. division level 4. state level Any comparison of UCR statistics should take into consideration demographic differences.
5	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1984).	Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1984, Bureau of the Census provisional estimates. Statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting 12 months of offense reports and estimated totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Totals" represent the above plus estimated offense totals for agencies having less than 3 months of offense reports. The offense breakdowns are according to UCR definitions (App. II).	Represents an estimation of reported crime activity for Index offenses at the state level. Any comparison of UCR statistics should take into consideration demographic differences.
6	All law enforcement agencies submitting complete reports for 12 months in 1984.	"Cities and Towns" are defined to be agencies in Population Groups I through V (App. III). The populations are July 1, 1984, estimates for each agency.	Represents reported crime activity of individual agencies in cities and towns 10,000 and over in population. Any comparison of UCR statistics should take into consideration demographic differences.
7	All university/college law enforcement agencies submitting complete reports for 12 months in 1984.	The 1983 student enrollment figures, which are provided by the U.S. Department of Education, are the most recent available.	Represents reported crime for individual university/college law enforcement agencies listed alphabetically by state. Totals are supplied for violent and property crimes. Any comparison of UCR statistics should take into consideration demographic differences.
8	All law enforcement agencies submitting complete reports for 12 months in 1984.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III). Population estimates of suburban counties are as of July 1, 1984.	Represents crime reported to individual law enforcement agencies in suburban counties. Any comparison of UCR statistics should take into consideration demographic differences.
9	All law enforcement agencies submitting complete reports for 12 months in 1984.	"Rural Counties" are those outside MSAs and not covered by city police agencies (App. III). Population classifications of rural counties are based on July 1, 1984, estimates for individual agencies.	Represents crime reported to individual rural county law enforcement agencies covering populations 25,000 and over. Any comparison of UCR statistics should take into consideration demographic differences.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
10-13	All law enforcement agencies submitting complete reports for at least 6 common months in 1983 and 1984.	The 1984 crime trend statistics are 2-year comparisons based on 1984 reported crime activity. Only common reported months for individual agencies are included in 1984 trend calculations. Populations represent July 1, 1984, estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	Slight decrease in national coverage for Table 13 due to editing procedure and lower submission rate.
14-17	All law enforcement agencies submitting complete reports for 12 months in 1984.	The 1984 crime rates are the ratios of the aggregated 1984 crime volumes and the aggregated 1984 populations of the contributing agencies. Population statistics represent July 1, 1984, estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	Slight decrease in national coverage for Table 17 due to editing procedure and lower submission rate.
18, 19	All law enforcement agencies submitting complete reports for at least 6 months in 1984.	Offense total and value lost total are computed for all Index offense categories other than aggravated assault. Percent distribution is derived based on offense total with each Index offense. Trend statistics are derived based on agencies with at least 6 common months complete for 1983 and 1984.	Aggravated assault is excluded from Table 18. For UCR Program purposes, the taking of money or property in connection with an assault is reported as a robbery.
20-23	All law enforcement agencies submitting complete reports for at least 6 months in 1984.	The 1984 clearance rates are based on offense and clearance volume totals of the contributing agencies for 1984. Population statistics represent July 1 estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III).	
24	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1984).	The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies in the UCR Program (including those submitting less than 12 months). The "Total Estimated Arrests" statistic is the sum of estimated arrest volumes for each of the 29 offenses. Each individual arrest total is the sum of the estimated volumes within each of the eight population groups (App. III). Each group's estimate is the reported volume (as shown in Table 25) divided by the percent of total group population reporting (according to July 1, 1984, estimates).	
25	All law enforcement agencies submitting complete reports for 12 months in 1984.	The 1984 arrest rates are the ratios, per 100,000 inhabitants, of the aggregated 1984 reported arrest statistics and population. The population statistics represent the July 1, 1984, estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III).	
26, 27	All law enforcement agencies submitting complete reports for 12 months in 1975 and 1984.	The arrest trends are the percentage differences between 1975 and 1984 arrest volumes aggregated from all common agencies. Population statistics represent July 1, 1984, estimates.	
28, 29	All law enforcement agencies submitting complete reports for 12 months in 1980 and 1984.	The arrest trends are the percentage differences between 1980 and 1984 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1984, estimates.	
30, 31	All law enforcement agencies submitting complete reports for 12 months in 1983 and 1984.	The arrest trends are 2-year comparisons between 1983 and 1984 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1984, estimates.	
32-38	All law enforcement agencies submitting complete reports for 12 months in 1984.		Slight decrease in coverage for Tables 37 and 38 due to editing procedure and lower submission of race and ethnic origin data.
39, 40	All city law enforcement agencies submitting complete reports for 12 months in 1983 and 1984.	The 1984 city arrest trends represent the percentage differences between 1983 and 1984 arrest volumes aggregated from common city agencies. "City Agencies" are defined to be all agencies within Population Groups I-VI (App. III).	
41-45	All city law enforcement agencies submitting complete reports for 12 months in 1984.	"City Agencies" are defined as agencies within Population Groups I-VI (App. III).	Slight decrease in coverage for Tables 44 and 45 due to editing procedure and lower submission of race and ethnic origin data.
46, 47	All suburban county law enforcement agencies submitting complete reports for 12 months in 1983 and 1984.	The 1984 suburban county arrest trends represent percentage differences between 1983 and 1984 volumes aggregated from contributing agencies. "Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
48-52	All suburban county law enforcement agencies submitting complete reports for 12 months in 1984.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	Slight decrease in coverage for Tables 51 and 52 due to editing procedure and lower submission rate.
53, 54	All rural county law enforcement agencies submitting complete reports for 12 months in 1983 and 1984.	The 1984 rural county arrest trends represent percentage differences between 1983 and 1984 volumes aggregated from contributing agencies. "Rural Counties" are defined as noncity agencies outside MSAs (App. III).	
55-59	All rural county law enforcement agencies submitting complete reports for 12 months in 1984.	"Rural Counties" are defined as noncity agencies outside MSAs (App. III).	Slight decrease in coverage for Tables 58 and 59 due to editing procedure and lower submission of race and ethnic origin data
60, 61	All suburban area law enforcement agencies submitting complete reports for 12 months in 1983 and 1984.	The 1984 suburban area arrest trends represent percentage differences between 1983 and 1984 arrest volumes aggregated from contributing agencies. "Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	
62-66	All suburban area law enforcement agencies submitting complete reports for 12 months in 1984.	"Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	Slight decrease in coverage for Tables 65 and 66 due to editing procedure and lower submission of race and ethnic origin data.
67	All law enforcement agencies submitting complete reports for 12 months in 1984.	Arrest totals are aggregated for individual agencies within each state. Population figures represent July 1 provisional estimates for 1984. The tabular breakdowns are according to UCR crime definitions (App. II).	Any comparison of statistics should take into consideration variances in arrest practices, particularly for Part II crimes.
68	All law enforcement agencies submitting complete reports for 12 months in 1984.	Population statistics represent July 1, 1984, estimates for individual agencies. See Appendix III for definitions of the population classifications presented.	Data furnished are based upon individual state age definitions for juveniles.

APPENDIX II
OFFENSES IN UNIFORM CRIME REPORTING

Offenses in Uniform Crime Reporting are divided into two groupings, Part I and Part II. Information on the number of Part I offenses known to law enforcement, the number cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Only arrest data are reported for Part II offenses.

The Part I offenses are as follows:

Criminal Homicide.– a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

Forcible rape.– The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used– victim under age of consent) are excluded.

Robbery.– The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault.– An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary-breaking or entering.– The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft).– The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

Motor vehicle theft.– The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

Arson.– Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The Part II offenses are:

Other assaults (simple).– Assaults and attempted assaults where no weapon was used and which did not result in serious or aggravated injury to the victim.

Forgery and counterfeiting.– Making, altering, uttering, or possessing, with intent to defraud, anything false which is made to appear true. Attempts are included.

Fraud.– Fraudulent conversion and obtaining money or property by false pretenses. Included are larceny by bailee and bad checks, except forgeries and counterfeiting.

Embezzlement.– Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

Stolen property; buying, receiving, possessing.– Buying, receiving, and possessing stolen property, including attempts.

Vandalism.– Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control.

Weapons; carrying, possessing, etc.– All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

Prostitution and commercialized vice.– Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

Sex offenses (except forcible rape, prostitution, and commercialized vice). – Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

Drug abuse violations.– State and local offenses relating to narcotic drugs, such as unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.

Gambling.– Promoting, permitting, or engaging in illegal gambling.

Offenses against the family and children.– Nonsupport, neglect, desertion, or abuse of family and children.

Driving under the influence.– Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

Liquor laws.– State or local liquor law violations, except "drunkenness" and "driving under the influence." Federal violations are excluded.

Drunkenness.– Offenses relating to drunkenness or intoxication. Excluded is "driving under the influence."

Disorderly conduct.– Breach of the peace.

Vagrancy.– Vagabondage, begging, loitering, etc.

All other offenses.– All violations of state or local laws, except those listed above and traffic offenses.

Suspicion.– No specific offense; suspect released without formal charges being placed.

Curfew and loitering laws.– Offenses relating to violations of local curfew or loitering ordinances where such laws exist.

Runaways.– Limited to juveniles taken into protective custody under provisions of local statutes.

APPENDIX III
UNIFORM CRIME REPORTING AREA DEFINITIONS

Community Types

Uniform Crime Reporting data are often presented using three community-type aggregations. These are Metropolitan Statistical Areas (MSAs), other cities, and rural counties.

The MSA concept was developed to facilitate the analysis and dissemination of uniform statistical information on metropolitan areas. The primary objective in establishing standard definitions of these areas was to make it possible for Federal agencies to utilize the same boundaries when publishing statistical data. Each MSA is an integrated economic and social unit with a recognized large population nucleus. Detailed criteria followed in establishing and defining MSAs can be found in the U. S. Department of Commerce publication, *Metropolitan Statistical Areas,* 1983 edition.

An MSA includes a central city of at least 50,000 population or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. Also included are the county containing the central city and contiguous counties having strong economic and social relationships to the central city and county. Counties in MSAs are designated suburban in UCR. An MSA may cross state lines.

New England MSAs are composed of cities and towns instead of counties. In this publication's tabular presentations, New England cities and towns are assigned to the proper MSA. However, some counties have both suburban and rural portions. Data for state police and sheriffs in those jurisdictions are included in statistics for the rural area.

MSAs made up approximately 76 percent of the total United States population in 1984. Some presentations in this book refer to "suburban area." A suburban area includes cities with less than 50,000 inhabitants in addition to counties (unincorporated areas) within the MSA. The central cities are, of course, excluded.

"Other cities," most of which are incorporated, are those outside MSAs. They comprised 10 percent of the 1984 population of the United States.

Rural counties, like "other cities," are outside MSAs. Covering areas not under the jurisdiction of city police departments, rural county law enforcement agencies offered service to 14 percent of the national population in 1984.

The following diagram illustrates the aforementioned discussion of the community types.

<table>
<tr><td rowspan="2">CITIES</td><td>MSA</td><td rowspan="2">NON-MSA</td></tr>
<tr><td>CENTRAL CITIES OVER 50,000
SUBURBAN CITIES</td></tr>
<tr><td>COUNTIES (unincorporated area)</td><td>SUBURBAN COUNTIES</td><td>RURAL COUNTIES</td></tr>
</table>

Population Groups

The population group classifications used by the UCR Program are as follows:

Population Group	*Political Label*	*Population Range*
I	City	250,000 and over
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI	City	Less than 10,000
VIII (Rural County)	County	N/A
IX (Suburban County)	County	N/A

The major source of UCR data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation, municipal incorporation, etc. Population figures for individual jurisdictions are estimated by the UCR Program in non-census years. To obtain the 1984 figures, for example, the 1982 to 1984 growth rate of each state was applied to each jurisdiction within the state. The 1982 base figures were Bureau of the Census city and county estimates.

The following table shows the number of UCR contributing agencies within each population group for 1984.

Population Group	*Number of Agencies*	*Population Covered*
I	60	43,390,000
II	122	17,774,000
III	303	20,712,000
IV	654	22,665,000
V	1,663	26,259,000
VI	7,766	25,355,000
VIII (Rural County)	3,599	33,749,000
IX (Suburban County)	1,601	46,258,000
Total	15,768	236,158,000[1]

[1]Due to rounding, the population covered does not add to total.

Regions and Divisions

As shown in the accompanying map, the United States is comprised of four regions: the Northeastern States, the Midwestern States, the Southern States, and the Western States. These regions are further divided into nine divisions. The following table delineates the regional, divisional, and state configuration of the country.

NORTHEASTERN STATES

New England
- Connecticut
- Maine
- Massachusetts
- New Hampshire
- Rhode Island
- Vermont

Middle Atlantic
- New Jersey
- New York
- Pennsylvania

MIDWESTERN STATES

East North Central
- Illinois
- Indiana
- Michigan
- Ohio
- Wisconsin

West North Central
- Iowa
- Kansas
- Minnesota
- Missouri
- Nebraska
- North Dakota
- South Dakota

SOUTHERN STATES

South Atlantic
- Delaware
- District of Columbia
- Florida
- Georgia
- Maryland
- North Carolina
- South Carolina
- Virginia
- West Virginia

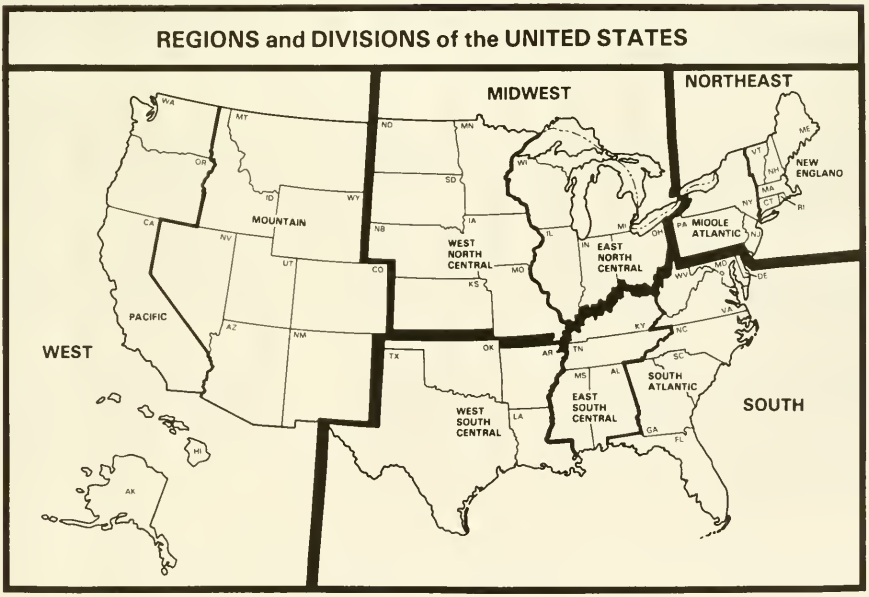
East South Central
- Alabama
- Kentucky
- Mississippi
- Tennessee

West South Central
- Arkansas
- Louisiana
- Oklahoma
- Texas

WESTERN STATES

Mountain
- Arizona
- Colorado
- Idaho
- Montana
- Nevada
- New Mexico
- Utah
- Wyoming

Pacific
- Alaska
- California
- Hawaii
- Oregon
- Washington



APPENDIX IV
INDEX OF CRIME, METROPOLITAN STATISTICAL AREAS, 1984

Metropolitan Statistical Area	Population	Crime Index total	Modified Crime Index total[1]	Violent crime[2]	Property crime[2]	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson[1]
Abilene, Tx. M.S.A.	**123,525**												
(Includes Taylor County.)													
City of Abilene	109,147	5,813		339	5,474	5	85	94	155	1,526	3,592	356

[1]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Arson data for individual cities are shown in Table 6.
[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]Figures are not comparable with previous years.

APPENDIX VI
GRAPHIC PRESENTATION OF AGE–SPECIFIC ARREST RATES, 1965-1983

This appendix was designed to visually represent historical changes in arrest rates for individual age groups. An age-specific arrest rate refers to the annual number of arrests made per 100,000 persons of a prescribed age or ages. In the following three-dimensional graphs, arrest rates are presented on the vertical axis. The two horizontal axes display calendar years 1965-1983 and age. The height of the graphic surface represents the arrest rate. Surface peaks denote the age group and year when arrest rates were highest.

A three-dimensional graph was created for each of the eight Index crimes of murder, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson. Since the vertical scale (arrest rate) differs in magnitude from one crime category to another, the calibration associated with each crime differs. For this reason, when the general appearance of the surfaces of two categories of crime are compared, caution should be exercised in order to avoid false graphic impressions leading to invalid conclusions.

Arrest rate surfaces are projected on two vertical planes: the arrest rate/year plane and the arrest rate/age plane. The first projection describes the historical changes in the height of the peaks and the second indicates the age variations in the arrest rate.

This appendix addresses historical age-specific arrest rates from a graphic perspective. In a separate publication entitled *Age-Specific Arrest Rates, 1965-1983,* the rates used to construct the graphs are presented. Limited copies of this document are available from the national UCR Program.
